EPA Reg Number

7364-46

Date of Issuance

AUG 02 2010

NOTICE OF PESTICIDE

Registration
 Reregistration
(under FIFRA, as amended)

Term of Issuance

Name of Pesticide Product

Tabex Algae Out

Name and Address of Registrant (include ZIP Code)

GLB Pool and Spa
1400 Bluegrass Lakes Parkway
Alpharetta, GA 30004

Note Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce In any correspondence on this product always refer to the above EPA registration number

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others

This product is reregistered in accordance with FIFRA provided that you

1) Submit and/or cite all data required for registration/reregistration review of your product when the Agency requires all registrants of similar products to submit data

Product Manager 22
Fungicide Branch
Registration Division (7504P)

Date

AUG 02 2010

EPA Reg 7364-46
Page 2

2) Add the cas # of 7758-99-8 to the copper sulfate pentahydrate in the ingredients section
Change “inerts ingredients” to “other ingredients”

3) Based on toxicity ranking per the acute toxicity review, the First Aid statements should be placed on the label in the following order

“IF IN EYES
IF ON SKIN OR CLOTHING
IF SWALLOWED
IF INHALED ”

Place the First Aid section in a box

4) As specified in the acute toxicity review, a phone number for emergency medical treatment information should be added to the label

5) Per the acute toxicity review, the Hazards to Humans and Domestic Animals must be revised to read

“DANGER
Corrosive Causes irreversible eye damage Causes skin burns Harmful if swallowed Harmful if absorbed through skin Harmful if inhaled Do not get in eyes, on skin, or on clothing Wear goggles or face shield, coveralls over long-sleeved shirt and long pants, chemical-resistant footwear, socks and chemical-resistant gloves made of any waterproof material ”

Note The text “Wash thoroughly with soap and water after handling Remove contaminated clothing and wash before reuse” may remain in this section of the label

6) The following revisions are needed to the Environmental Hazards section of the label

-The text “Statement for end-use products in containers **less than greater than** 5 gallons or 50 pounds” appearing in the Environmental Hazards section of the label is confusing and must be revised

-The text “This product is toxic to fish and aquatic organisms” appearing under the heading ‘Statement for end-use products in containers less than 5 gallons or 50 pounds’ must be revised to read “This product is toxic to fish and aquatic organisms and may contaminate water through runoff”

7) Per the product chemistry review, the storage and disposal section should be revised per PR Notice 2007-4

EPA Reg 7364-46

Page 3

8) Per the RED, the following text must be added to the directions for use

“Do not apply this product in a way that will contact adults, children, or pets either directly or through drift Do not allow adults, children, or pets to enter the treated area until dusts have settled”

9) Please add a warranty statement to the product label For suggestions for an appropriate warranty statement, please see <http://www.epa.gov/oppfead1/labeling/lrm/chap-12.htm#IX> Please note that your warranty statement must include the “to the extent consistent with applicable law” language as detailed in <http://www.epa.gov/oppfead1/labeling/lrm/chap-12.htm#IX>

10) To the Directions for use specify that 1 gallon of product will treat 28,859 gallons of water Delete “treats 20,000 gallons” Delete “distribute 3 pounds etc)” This equals 1 ppm of metallic copper 1 gallon of product contains 0.2409 lbs of metallic copper based on your csf

A stamped copy of the label is enclosed for your records You must submit one copy of the final printed label before you release the product for shipment Products shipped after 12 months from the date of this letter or the next round of printing must bear the new revised label If these EPA conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA Your release for shipment of the product constitutes acceptance of these EPA Reg conditions This label supersedes all other previously accepted labels If you have any questions please call Erik Kraft at 703-308-9358 or email at Kraft.Erik@epa.gov

Tabex Algae Out

CONTAINS NO CALCIUM

[Current list of marketing bullets – optional may or may not be used on final labels]

- The "All in One" Product
- Shock Treats
- Controls Algae
- Buffers pH
- Supplements your Chlorine
- Improves Water Quality or Clarity
- Treats 20 000 Gallons
- All-In-One shock Treatment and algaecide
- Eliminates contaminants while treating algae
- Shock treats & controls all algae including black green and yellow
- Does not affect Ph
- Improves water clarity by supplementing the chlorine already in the pool
- One bottle treats 20 000 Gallons
- Granular formulation for simple application
- Contains chelated copper to prevent staining
- Compatible with bromine chlorine and salt water

ACCEPTED

DIRECTIONS FOR USE

**It is a violation of Federal Law to use this product in a manner inconsistent with its labeling
REENTRY INTO TREATED SWIMMING POOLS IS PROHIBITED ABOVE LEVELS OF 3 PPM OF CHLORINE**

[This product] contains a chelated copper sulfate [This product] is formulated for immediate anti-algae shock treatment as well as for extended relief from algae. It is not intended to take the place of regular maintenance of algaecide levels. For best results use [this product] in evening after pool use is discontinued for the day.

Compatible with bromine, chlorine, salt water, ozone and minerals.

Use this product as follows:

1. Adjust pool water pH to 7.2 - 7.8 range with a total water alkalinity range of 100 to 150 ppm each as determined by suitable test kits.
2. To control pool water algae, distribute 3 pounds over water surface for each 20,000 gallons of pool water (for 10,000 gallons use 1/2 jar, etc.). This will raise pool water chlorine residual to 4 ppm for immediate anti-algae shock treatment and 1 ppm of chelated copper sulfate for extended relief.
3. Repeat dosage as needed to keep pool water clean.

Unlike many other algaecides, this product will not combine with and neutralize chlorine residuals already in the pool. This means that this product and chlorine in your pool will work together rather than destroying each other. In addition, this product will not upset the pH balance of your pool; it is buffered.

FIRST AID

IF SWALLOWED Call a poison control center immediately for treatment advice. Have the person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or a doctor. Do not give anything by mouth to an unconscious person.

IF IN EYES Hold eyelids open and rinse slowly with water for 15 to 20 minutes. Remove contact lenses if present after 5 minutes, then continue rinsing eye. Call poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment.

NOTE TO PHYSICIAN Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER

CORROSIVE, Causes irreversible eye damage. Causes skin irritation. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or on clothing. Avoid breathing dust. Wear goggles or face shield. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

PHYSICAL OR CHEMICAL HAZARDS

Strong oxidizing agent. Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood with large volumes of water if necessary.

ENVIRONMENTAL HAZARDS

{Statement for end-use products in containers less than 5 gallons or 50 pounds }

This product is toxic to fish and aquatic organisms.

{Statement for end-use products in containers less than greater than 5 gallons or 50 pounds }

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

6/6

STORAGE & DISPOSAL Do not contaminate food or feed by storage or disposal or cleaning of equipment

PESTICIDE STORAGE Keep this product dry in a tightly closed container, when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame.

PESTICIDE DISPOSAL In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding the container.

CONTAINER DISPOSAL Nonrefillable container – Do not reuse container. Triple rinse thoroughly before discarding in trash.
