Net Contents: 1 Quart (32 fl. oz.)

This product is efficient, economical and stable in use dilution. It is compatible with most chemicals used in pool water and will not damage tile, concrete, metal, or plastics. Do not, however, pre-mix with other chemicals before application.

Keeps pool water free and sparkling, clear of visible algae, slime and green-brown colors. It improves filter operation and cuts down need for other chemicals, and imparts tone and pleasant "feel" to swimming pool water.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

INITIAL APPLICATION: To a cleaned pool add 1 gallon to 50,000 gallons of water, or ratio thereof.

MAINTENANCE DOSE: 32 oz. per 50,000 gallons of water every 5 to 7 days. When weather is hot or bathing load is heavy, use this dosage every 5 days or as necessary.

BOOSTER DOSE: Immediately after every rain, add one quart per 50,000 gallons of water as above.

WINTER DIRECTIONS:

For pools which have been properly maintained during the swimming season and are free of visible algae add 16 oz. per 10,000 gallons of water. For pools that have some visible algae growth at the end of the swimming season add 64 fl. oz. per 10,000 gallons of water. Be sure to circulate the water for 2 to 4 hours prior to closing.

Pour the required amount of this product into a plastic watering can, fill with water, and sprinkle the diluted product around the edge of the pool. For best results, the mixture should be distributed equally around the edge of the pool with the filter running, and the pH and chlorine levels in the acceptable range.

IMPORTANT: Follow above directions without fail, even when pool is not used. Algae growth must be fought at all times.
