**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**SUPER CHARGE** is a concentrated dry chlorine agent which helps restore sparkling, clear pool water by reducing organic wastes from such contaminants as suntan lotions, hair spray, cosmetics, urine, perspiration and mucous discharge. Use only as directed.

1. Use **SUPER CHARGE** at the rate of 1 pound per 10,000 gallons of swimming pool water. Add total required amount at one time. Scatter this granular product directly over the pool water surface. Use **SUPER CHARGE** only when pool is not in use. It will produce a temporary high chlorine level. Do not enter pool until the chlorine residual has dropped to a level of 2 ppm as determined by a suitable test kit.
2. Between **SUPER CHARGE** applications, maintain required 1.0 - 1.5 ppm chlorine residual in pool water.

Never mix this product with any other chemical. Do not use in feeder, float or skimmer. Always mix only in pool water by scattering product over pool surface.

**WINTERIZING:**

While water is still clear & clean, apply 0.8 oz. of product per 1000 gallons, while filter is running, to obtain a 3 ppm available chlorine residual, as determined by a suitable test kit. Cover pool, prepare heater, filter and heater components for winter by following manufacturers' instructions.

**STORAGE AND DISPOSAL:**

**STORAGE:** Keep this product dry in a tightly closed container, when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding this container.  
**DISPOSAL:** Do not reuse empty container but place in trash collection.
