

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

PHYSICAL AND CHEMICAL HAZARDS • STRONG OXIDIZING AGENT: Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area, or bury in a safe place.

aqua chem™

DRY CHLORINATING GRANULES

KEEPS SWIMMING POOLS FREE OF ALGAE

*ACTIVE INGREDIENT:
Sodium Dichloro-S-
Triazinetrione, Dihydrate 93.1%
INERT INGREDIENTS: 6.9%
*Available chlorine 56%

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

1. **STERILIZE** the pool with AQUA CHEM STABILIZER/CONDITIONER (Cyanuric Acid). Omit if this has been done previously.
2. **MEASURE** pH at least once a week with an AQUA CHEM TEST KIT. Adjust pH to 7.2-7.8, if necessary, by adding AQUA CHEM DRY ACID™ or LIQUID ACID™ to reduce pH or AQUA CHEM pH ADD™ to increase pH.
3. **CHECK** RESIDUAL CHLORINE with an AQUA CHEM TEST KIT. If below 1.0 part per million (PPM), add 10 ounces AQUA CHEM DRY CHLORINATING GRANULES per 10,000 gallons. Repeat this dosage until a chlorine residual of 1.0-1.5 PPM has been established. Add product to water by broadcasting over pool surface, preferably at deep end. Bleaching or material damage may occur with colored plaster, vinyl, wood or fiberglass pool surfaces. If in doubt, check with pool manufacturer. When starting up a new pool, or reopened pool, superchlorinate to satisfy initial chlorine demand and establish a chlorine residual of 1.0-1.5 PPM available chlorine.
4. **MAINTAIN** RESIDUAL CHLORINE. Add 2-3 ounces per 10,000 gallons every other day or as needed to maintain 1.0-1.5 PPM residual chlorine. Two ounces of AQUA CHEM DRY CHLORINATING GRANULES supply 1.0 PPM chlorine to 10,000 gallons. Remember — an increase in weather temperature, bather load or water temperature will cause your pool to use more chlorine.

IMPORTANT NOTES

1. It is a good practice to "superchlorinate" each 2-4 weeks. To superchlorinate, add 10 ounces AQUA CHEM SHOCK to 10,000 gallons or 1/2 gallon AQUA CHEM TOP CLOR (Swimming Pool Chlorinating Liquid) to 10,000 gallons. Resume regular program when residual chlorine falls to 1.0-1.5 PPM.
 2. AQUA CHEM DRY CHLORINATING GRANULES contain "built-in" conditioner (Cyanuric Acid). If it is used regularly, no further additions of AQUA CHEM STABILIZER/CONDITIONER (Cyanuric Acid) will be required.
- *Follow directions for use on labels of these AQUA CHEM products.

NOTE: This product is sold by weight. Settling of contents during storage and handling will occur.

KEEP OUT OF REACH OF CHILDREN
DANGER

PRACTICAL TREATMENT (FIRST AID): If swallowed feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately. • **IF ON SKIN:** Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. • **IF IN EYES:** Flush with cold water for at least 15 minutes. Get medical attention. SEE ADDITIONAL PRECAUTIONS ON SIDE PANEL.
