

FOR AUTOMATIC AND FLOATING FEEDERS. DIRECTIONS FOR USE (SWIMMING POOLS)

1. **STABILIZE** with G-P Conditioner (cyanuric acid)*
2. **CHECK RESIDUAL CHLORINE** with a suitable chlorine test kit. If below 1.0 part per million (PPM) add G-P Dry Chlorine or G-P TapClor Liquid Swimming Pool Chlorine* to establish residual chlorine at 1.0-1.5 PPM.
3. **MAINTAIN RESIDUAL CHLORINE** at 1.0-1.5 PPM by placing tablets in an automatic feeder or floating feeder designed for tablets of this size and active ingredient. Each tablet supplies about 10 PPM available chlorine per 5,000 gallons water. If refilling an adjustable feeder, start with setting you normally use. Check residual chlorine frequently; adjust setting as necessary to maintain 1.0-1.5 PPM residual chlorine. If refilling a non-adjustable feeder, add about 1 tablet per 5,000 gallons. Check chlorine and adjust subsequent additions as necessary to maintain 1.0-1.5 PPM residual chlorine.
4. **MEASURE pH** immediately and at least once each week with a suitable test kit. Adjust pH to 7.2-7.8 if necessary by adding G-P Liquid Acid or G-P Dry Acid* to reduce pH, or by adding G-P Soda Ash to increase pH.*

*Follow Directions for Use on labels of these products.
 NOTE: G-P Large Trichlor Tablets contain "built-in" Conditioner (cyanuric acid). If used regularly, no further additions of G-P Conditioner will be required.

ACTIVE INGREDIENT
 Trichloro-s-Triazinetrione 100%
 Available Chlorine 90%

LARGE TRICHLOR TABLETS

Approx. 3" diameter, 7-1/3 oz. av. each.
 For automatic and floating feeders.
 Slow-dissolving, stabilized type.

NET WT. 25 LBS.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

DANGER: CORROSIVE: Causes eye damage. May cause burns on moist or broken skin. Do not get in eyes, on skin, or on clothing. May be harmful or fatal if swallowed.

Strong oxidizing agent. Contact with heat, moisture, foreign material, other chemicals, or contamination from any source may result in fire or explosive decomposition. Will burn with evolution of hazardous and irritating chlorine-containing gases. Avoid contamination with combustible materials or moisture. Keep away from heat and open flames. Store product in tightly-closed container in a cool, dry place when not in use. In case of fire, isolate container in well-ventilated area and flood with water. Do not refill this container. Rinse empty container thoroughly with water and discard it.

DANGER: KEEP OUT OF REACH OF CHILDREN

SEE FIRST AID STATEMENT AND OTHER PRECAUTIONS ON SIDE PANEL.

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.
