BACK/SIDE PANEL (COLUMN 1)

PRODUCT DESCRIPTION: Aqua Chem™ 3" (6 oz.) Tablets are a convenient way to regulate the chlorine that sanitizes your pool. They contain cyanuric acid, a stabilizer, which reduces chlorine loss from sunlight and other factors. As tablets dissolve, they release sufficient chlorine to reduce the growth of harmful algae and micro-organisms in your pool for several weeks. If used regularly, no additional stabilizer is needed.

IMPORTANT NOTES: 1. For best results, use these tablets in a dissolving basket or floating feeder designed for this product. 2. Do not allow them to come in contact with fiberglass, steel, or vinyl pool linings to avoid discoloration or other damage. 3. Do not throw tablets directly into pool. 4. Do not add tablets directly to skimmer. 5. Do not use chlorinating tablets in any type of feeder which may contain remnants of any other pool chemical product or organic matter.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in any manner inconsistent with its labeling.

BEFORE YOU BEGIN

1. Make sure all pool equipment is working properly, including pump, filter, skimmer and heater.
2. For water with unstabilized chlorine, add Aqua Chem Stabilizer following label directions.
3. Check residual chlorine level with an Aqua Chem Test Kit. Desirable range is 1.0-1.5 parts per million (ppm). If necessary, add Aqua Chem Stabilized Granules or Aqua Chem Liquid Chlorinizer according to label directions until the chlorine reaches desired level.
4. Also check water pH (acidity/alkalinity balance) with an Aqua Chem Test Kit. Water pH should be 7.2-7.6. If not, adjust by adding Aqua Chem pH Decreaser to lower pH, or Aqua Chem pH Add to raise pH. Be sure to follow product label directions.

NOW USE AQUA CHEM 3" STABILIZED TABLETS

1. To maintain residual chlorine between 1.0-1.5 ppm, place appropriate number of tablets in an automatic feeder designed for this type of product. Each 3" (6 oz.) tablet supplies approximately 7-10 ppm available chlorine per 5,000 gallons of water. If you are using an adjustable automatic feeder, start with the setting you normally use, or adjust to the center setting. Check residual chlorine level frequently with Aqua Chem Test Kit and adjust feeder setting to maintain level of 1.0-1.5 ppm.
2. For non-adjustable feeders, add approximately one 3" (6 oz.) tablet per 5,000 gallons of water. Check residual chlorine level, and add more tablets if necessary to maintain level between 1.0-1.5 ppm.

BACK/SIDE PANEL (COLUMN 2)

3. Do not allow swimmers in pool until residual chlorine level is between 1.0 to 3.0 ppm.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

STATEMENT OF PRACTICAL TREATMENT (FIRST AID): IF SWALLOWED: Drink promptly a large quantity of water. Do not induce vomiting. Avoid alcohol. Call a physician immediately. IF ON SKIN: Brush off excess dry chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention. IF IN EYES: Flush with cold water for at least 15 minutes. Obtain medical attention. **NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage.

**IN THE EVENT OF A MEDICAL EMERGENCY
CALL COLLECT: 1-303-623-5716**

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance, contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS/STRONG OXIDIZING AGENT: Mix only with water. Use clean dry, utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction, with generation of heat, liberation or hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

BACK/SIDE PANEL (COLUMN 2) (CONT.)

STORAGE AND DISPOSAL: Keep this product in tightly closed original container when not in use. Store in a locked, cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding this container. Do not reuse empty container, but place in trash collection. Do not contaminate food or feed by storage, or disposal, or cleaning of equipment.

If you have any questions or comments about Aqua Chem Products or their use, please call us toll free. In the continental U.S. call 1-800-252-POOL. Ask for your free pool care booklet.
