

DIRECTIONS FOR USE

FABRIC CARE

LAUNDRY — Top loading automatics and wringer type washers, use 1 cup SANI-CLOR Bleach per load. Front loading automatics, use ½ cup SANI-CLOR Bleach per load. Follow washer directions for automatic bleach dispensers. Never pour SANI-CLOR Bleach directly on clothes — either add to wash water alone or pre-dilute in 1 quart water if clothes are already in washer. For hand laundering, use ¼ cup per 2 gallons water.

REMOVING STAINS — Use a solution of ½ cup SANI-CLOR Bleach per gallon of water for stains like coffee, tea, mustard, ink, fruit, collar dirt, grass, scorch, mildew, diaper stains, vegetable, chocolate, ketchup, or even age-yellowed nylon. For protein-type stains — egg, milk, blood, use ½ cup SANI-CLOR Bleach per gallon cool, sudsy water. Soak for 5-10

minutes, rinse well, and follow with a regular wash. If in doubt about color fastness, soak an inconspicuous part of fabric before immersing entire article.

DIAPERS — For pail pre-soak, use ¼ cup SANI-CLOR Bleach per 2 gallons water. For wash, flush out soiled diapers, then follow regular laundering instructions above.

NOTE: SANI-CLOR Bleach will not harm fabrics when used as directed on all white and colorfast fabrics of: cotton, linen, rayon, polyester (Dacron), rayon, acrylic (Orlon), acetate (Chromspun), modacrylic (Dynel), triacetate (Arnel), and permanent press. Do not use on silk, wool, mohair, leather, spandex (Lycra), or any non-fast colored fabrics.

HOUSEHOLD USE

BATHROOM AND KITCHEN SURFACES — To deodorize, disinfect, and remove stains (bathtubs, sinks, refrigerators, stoves, tile, linoleum, porcelain, enameled metal) — First wash, then spread solution of ¼ cup SANI-CLOR Bleach per quart warm water with cloth or sponge. After 2 minutes, rinse well.

TABLEWARE — Wash, then soak 2 minutes in solution of two ounces SANI-CLOR Bleach per 5 gallons of water (do not use on silverware). This dilution gives 200 PPM available chlorine.

TOILET BOWL — Clean and flush. Pour in ½ cup SANI-CLOR Bleach, swab, let stand for 10 minutes, flush again. Do not mix with any other household chemicals.

SICKROOM EQUIPMENT — Wash thoroughly with warm, sudsy water. Soak in solution of ¼ cup SANI-CLOR Bleach per gallon of water. Soak 5 minutes, then rinse well.

GARBAGE CANS — Wash with hot, sudsy water. Rinse, Pour in ½ cup SANI-CLOR Bleach per gallon of water and swab inside. Let stand 5 minutes, then rinse.

CAUTION: Harmful if swallowed. Keep out of reach of children.

May cause severe eye and skin irritation. Do not use with ammonia, bowl cleaners, or other household chemicals. Add SANI-CLOR Bleach only to water; may cause fire or explosion if mixed with other chemicals. Keep upright and in a cool place.

FIRST AID: If swallowed, feed milk, egg whites, or large quantities of water. If splashed in eyes, flood immediately with water. If in contact with skin, flush with plenty of water. Call a doctor right away.

GLB BRAND

START-UP C

Specifically Formulated For Starting Up Swimming Pools.

Use **GLB BRAND START-UP C** just once, then use **GLB BRAND CONCENTRATED GRANULAR CHLORINE** to sanitize your swimming pool water.

ACTIVE INGREDIENT:

(*)Sodium Dichloro-s-triazinetrihydrate 49.1%

INERT INGREDIENTS: 50.9%

TOTAL 100.0%

(*)Provides 27.5% available chlorine

DANGER

KEEP OUT OF REACH OF CHILDREN

See First Aid Statement and Required Statements on the Back Panel

NET WEIGHT 10LB • 4.54 KG

DIRECTIONS FOR USE

GLB BRAND START-UP C superchlorinates swimming pool water by effectively oxidizing or "burning out" organic pollutants such as pollen, leaves, organic matter from trees, growing plants, grass and other sources. **GLB BRAND START-UP C** simultaneously provides cyanuric acid (s-triazinetrihydrate) to stabilize chlorine. Use **GLB BRAND START-UP C** just once to start your pool off, then use **GLB BRAND CONCENTRATED GRANULAR CHLORINE** to chlorinate your pool.

GLB BRAND START-UP C is not for maintaining a chlorine residual since a chlorine residual is established as a result of the use of this product; it is a conditioner which prepares the swimming pool water for **GLB BRAND CONCENTRATED GRANULAR CHLORINE** and permits you to get immediate maximum chlorine effectiveness and economy.

HOW TO USE GLB BRAND START-UP C

1. Clean or backwash filter.
2. Using a reliable test kit, test the pH level and adjust it to 7.2 to 7.6 (if it is above 7.6 add dry acid, if it is below 7.2, add soda ash or sodium bicarbonate).
3. In the amount shown in the table below — add **GLB BRAND START-UP C** slowly through the surface skimmer.
4. Wait two hours and again adjust pH to 7.2 to 7.6.
5. Test chlorine residual with a reliable test kit. Do not allow swimmers in pool until chlorine residual has dropped below 2.0 ppm.

6. Add **GLB BRAND CONCENTRATED GRANULAR CHLORINE** according to package directions to maintain a minimum chlorine residual of 1.0 to 2.0 ppm at all times

| POOL CAPACITY (gallons) | DOSAGE | |
|-------------------------|---|--|
| | To Provide 25 ppm Cyanuric Acid and 10 ppm Available Chlorine | To Provide 10 ppm Cyanuric Acid and 8.7 ppm Available Chlorine |
| 5 000 | 1 lb 9-1/2 oz | 1 lb 4 oz |
| 10 000 | 3 lb 3 oz | 2 lb 8 oz |
| 15 000 | 4 lb 12-1/2 oz | 3 lb 12 oz |
| 20 000 | 6 lb 6 oz | 5 lb |
| 25 000 | 7 lb 15-1/2 oz | 6 lb 4 oz |
| 30 000 | 9 lb 9 oz | 7 lb 8 oz |
| 35 000 | 11 lb 2-1/2 oz | 8 lb 12 oz |
| 40 000 | 12 lb 12 oz | 10 lb |

DANGER

KEEP AWAY FROM CHILDREN

STRONG OXIDIZER. Harmful if swallowed. May irritate skin, eyes, nose and throat. Dust may be harmful if inhaled. Do not take internally. Keep out of eyes and off skin. Avoid inhalation of dust.

STORE in a cool, dry, well ventilated area. Moisture contamination may liberate irritating and hazardous chlorine-containing gases. Oxidizing material; do not mix with other chemicals. Contact with organic matter may cause fire. Burning will produce chlorine or equally toxic gases. Do not re-use container. Rinse empty container thoroughly with water before discarding.

FIRST AID

INTERNAL - Feed bread soaked in milk followed by olive oil or cooking oil. Call a physician.

EXTERNAL - In case of contact, remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes, get medical attention. Clean contaminated clothing before re-use.

ENVIRONMENTAL HAZARD

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.
