

FOR AUTOMATIC AND FLOATING FEEDERS. DIRECTIONS FOR USE (SWIMMING POOLS)

1. **STABILIZE** with G-P Conditioner (cyanuric acid)*
2. **CHECK RESIDUAL CHLORINE** with a suitable chlorine test kit. If below 1.0 part per million (PPM) add G-P Dry Chlorine or G-P TopClor Liquid Swimming Pool Chlorine to establish residual chlorine at 1.0-1.5 PPM.
3. **MAINTAIN RESIDUAL CHLORINE** at 1.0-1.5 PPM by placing tablets in an automatic feeder or floating feeder designed for tablets of this size and active ingredient. Each tablet supplies about 2 PPM available chlorine per 1,000 gallons of water. In refilling an adjustable feeder, start with setting for normally use. Check residual chlorine frequently and adjust setting as necessary to maintain 1.0-1.5 PPM residual chlorine. When refilling an adjustable feeder, add about 10 tablets per 10,000 gallons. Check residual chlorine frequently and add tablets as necessary to maintain 1.0-1.5 PPM residual chlorine.
4. **MEASURE** pH frequently and at least once per week with a suitable test kit. Adjust pH to 7.2-7.6 by adding G-P Liquid Alkalizer to raise pH or by adding G-P Acid to reduce pH, or by adding G-P Buffer to raise or lower pH.

NOTE: For best results, use G-P products in the following order: 1. Stabilizer, 2. Chlorine, 3. pH adjuster. This order of application will insure proper balance of the pool water.

ACTIVE INGREDIENT
Trichloro-s-Triazinetrione 100%
Available Chlorine 100%

ON BACK PANEL

Approx. 1" diameter, 1/2 oz. av. each
For automatic and floating feeders.
Slow dissolving, stabilized type.

NET WT. 8 LBS.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

DANGER: CORROSIVE Causes eye damage. May cause burns on moist or broken skin. Do not get in eyes, on skin, or on clothing. May be harmful or fatal if swallowed.

Strong oxidizing agent. Contact with heat, moisture, foreign material, other chemicals, or contamination from any source may result in fire or explosive decomposition. Will burn with evolution of hazardous and irritating chlorine-containing gases. Avoid contamination with combustible materials or moisture. Keep away from heat and open flames. Store product in tightly-closed container in a cool, dry place when not in use. In case of fire, isolate container in well-ventilated area and flood with water. Do not refill this container. Rinse empty container thoroughly with water and discard it.

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.
