

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or other waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS - STRONG OXIDIZING AGENT: Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool dry, well ventilated area away from heat or open flame. In case of decomposition of the container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area, or bury in a safe place.

NOTE: This product is sold by weight. Settling of contents during storage and handling will occur.

aqua chem™

**SPA CLOR™
CHLORINATING
GRANULES**

Especially for maintaining spas free of algae and bacteria

*Active Ingredient:
Sodium Dichloro-S-
Triazinone 93.1%
Inert Impurities 6.9%
*Available Chlorine 56%

ACCEPTED
19 JAN 1982
7368-37
UNDER THE FEDERAL INSECTICIDE
FUNGICIDE AND RODENTICIDE ACT
FOR ECONOMIC POISON REGISTERED
UNDER FIF.

**KEEP OUT OF REACH OF CHILDREN
DANGER**

FIRST AID: If swallowed, food bread washed in milk followed by olive oil or cooking oil. Call a physician immediately. • IF ON SKIN: Wash off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. • IF IN EYES: Flush with cold water for at least 15 minutes. Get medical attention. SEE ADDITIONAL PRECAUTIONS ON SIDE PANEL

NET WT. 32 OZ. (2 LBS.)

DIRECTIONS FOR USE IN SPAS

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Because water temperature has a substantial effect on the rate of loss of available chlorine from water, the directions for use are slightly different for "in-use" conditions and "non-use" conditions. Regardless of temperature, there is always a requirement for minimum available chlorine to prevent algae and bacteria.

A. "IN-USE" CONDITIONS (50°F to 120°F, depending on personal preference)

1. **CHECK AVAILABLE CHLORINE** with an AQUA CHEM TEST KIT* before entering spa. If below 1.0 part per million (PPM) add 2 teaspoons AQUA CHEM SPA CLOR™ chlorinating granules for each 500 gallons. Repeat this dosage until available chlorine of 1.0 to 3.0 PPM has been established as determined with the test kit. Add product to water by broadcasting over spa surface.

2. **MAINTAIN AVAILABLE CHLORINE.** Add one teaspoon AQUA CHEM SPA CLOR per 500 gallons each 20 minutes or as required to maintain 1.0-3.0 PPM available chlorine (one teaspoon AQUA CHEM SPA CLOR supplies approximately 1.5 PPM available chlorine to 500 gallons). Frequency of addition will depend primarily on exact temperature and bather load. Test spa water frequently with suitable chlorine test kit to assure proper concentration of available chlorine.

B. "NON-USE" CONDITIONS (below 50°F)

1. **CHECK AVAILABLE CHLORINE** with an AQUA CHEM TEST KIT* if below 1.0 PPM, add 1 teaspoon AQUA CHEM SPA CLOR for each 500 gallons. Repeat this dosage until available chlorine of 1.0-1.5 PPM has been established as determined with the test kit. Add product to water by broadcasting over spa surface.

2. **MAINTAIN AVAILABLE CHLORINE.** Add one teaspoon AQUA CHEM SPA CLOR per 500 gallons daily or as needed to maintain 1.0-1.5 PPM available chlorine.

IMPORTANT NOTES

1. Measure pH immediately and at least once each week with an AQUA CHEM TEST KIT*. Adjust pH to 7.2-7.8 if necessary by adding AQUA CHEM DRY ACID™ or LIQUID ACID™ to reduce pH, or by adding AQUA CHEM pH-ADD™ to increase pH.

2. It is a good practice to "Superchlorinate" your spa approximately each two weeks to destroy compounds from perspiration and other possible organic contamination which can interfere with proper sanitization. To "Superchlorinate," add 6 teaspoons per 500 gallons. Do not resume use of the spa until available chlorine drops to 3.0 PPM.

**HOW TO CALCULATE SPA CAPACITY
GALLONS OF WATER**

SHAPE OF SPA (Dimensions in feet)
Rectangular..... Average depth x average length x average width x 7.5
Circular..... Diameter x diameter x average depth x 5.9
Irregular..... Estimate dimensions equivalent to rectangular or circular and calculate as above, or consult spa builder.
Measure Equivalents: 1 ounce = 2 tablespoons = 6 teaspoons

*Follow directions for use on labels of these AQUA CHEM products.
