

**DIRECTIONS FOR USE**

Use of this product in any manner inconsistent with its labeling is a violation of Federal Law.

**PRODUCT DESCRIPTION:** Aqua Chem™ Spa Stabilized Chlorinating Granules are a fast-dissolving easy-to-use source of chlorine for spas and hot tubs. Maintaining the correct chlorine level is important for purposes of water cleanliness and prevention of sea or tub damage.

**IMPORTANT NOTES**

1. Water temperature and bather load strongly affect the depletion rate of available chlorine in water. In any case, a minimum available chlorine level of 1.0 parts per million (ppm) is always necessary to prevent growth of algae and bacteria. Testing and chlorine addition should be adjusted to your personal usage pattern.
2. Spas and hot tubs should be given a chlorinating shock treatment at least twice monthly or more frequently for heavily used installations. This procedure destroys organisms and other matter which contaminate water and create unsanitary conditions. To shock treat, add Aqua Chem Chlorinating Granules at a rate of 6 teaspoons per 500 gallons of water. Do not resume use of the unit until available chlorine drops to a level of 2.0 parts per million (ppm) or less, as determined with a test kit.

**HOW TO USE AQUA CHEM SPA STABILIZED CHLORINATING GRANULES**

1. Before using any water treatment chemicals, check to ensure all spa equipment is working properly including pump, filter, saucer and heater.
2. Under any circumstance, the pH or alkalinity/acidity balance should be checked at least once weekly with an Aqua Chem Test Kit. The water pH range should be between 7.4-7.6. Adjust as needed by adding Aqua Chem Spa pH Decreaser to lower pH, or by adding Aqua Chem Spa pH Increaser to raise pH. Follow label directions and retest after treatment to ensure accurate pH adjustment.
3. Check available chlorine with an Aqua Chem Test Kit. If measurement is below 1.0 part per million (ppm), add Aqua Chem Spa Stabilized Chlorinating Granules at a rate of 2 tablespoons per 500 gallons of water. Add 1/2 teaspoon per 100 gallons of water. Repeat procedure until desired level is reached. Available chlorine should be maintained between 1.0-2.0 ppm.
4. To maintain proper available chlorine level, add Aqua Chem Spa Stabilized Chlorinating Granules at a rate of 1 teaspoon per 500 gallons of water as indicated by frequent testing per Step 1 (above). Maintain available chlorine at a level between 1.0-2.0 ppm.

AQUA CHEM IS A TRADE MARK OF GEORGIA PACIFIC CORPORATION.

Note: Maintenance chlorine addition depends heavily on number of bathers and frequency and duration of use. Hotter water and greater total use lower available chlorine level more rapidly. Under these use conditions, check more frequently and adjust chlorine level as outlined above.

**PRECAUTIONARY STATEMENTS - HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER:** Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Rinse and wash contaminated clothing before reuse.

**ENVIRONMENTAL HAZARDS:** This product is toxic to fish. Do not discharge into lakes, streams, ponds or public waters, unless in accordance with an NPDES Permit. For guidance, contact the regional office of the EPA.

**PHYSICAL AND CHEMICAL HAZARDS/STRONG OXIDIZING AGENT:** Mix only with water. Use clean, dry utensils. Do not mix this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reuse container. If possible, isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

**STORAGE AND DISPOSAL:** Keep this product in tightly closed original container when not in use. Store in a locked, cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding the container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage or disposal, or cleaning of equipment.

**NOTE:** This product is sold by weight. Sealing of containers during storage and handling will occur.

# AQUA CHEM SPA CARE

## STABILIZED CHLORINATING GRANULES

### LONG LASTING CHLORINIZING PROTECTION

ACTIVE INGREDIENT: Sodium Dichloro-S-Triazinethione 96.0%  
INERT INGREDIENTS: 4.0%

Available Chlorine 62%  
**KEEP OUT OF REACH OF CHILDREN  
DANGER**

**PRACTICAL TREATMENT (FIRST AID): IF SWALLOWED** Feed victim bread soaked in milk, followed by olive oil or cooking oil. Call physician immediately. **IF ON SKIN** Brush off excess dry chemical, flush skin with cold water for at least 15 minutes. If irritation persists, obtain medical attention. **IF IN EYES** Flush with cold water for at least 15 minutes. Obtain medical attention. SEE ADDITIONAL PRECAUTIONS ON THIS LABEL.

NET WT 16 OZ
