PRODUCT DESCRIPTION: Aqua Chem Stabilized Granules for Spas are a convenient way to regulate the chlorine that sanitizes your spa or hot tub. They contain cyanuric acid, a stabilizer which reduces chlorine loss from sunlight and other factors. As granules dissolve they release sufficient chlorine to reduce the growth of harmful algae and micro organisms which can multiply to produce unsanitary water conditions. If used regularly, no additional stabilizer is needed.

- IMPORTANT NOTES**
- When using other Aqua Chem products, as outlined in directions for Aqua Chem Stabilized Granules, always follow label directions for these products.
 - Aqua Chem Stabilized Granules may cause damage to colored plastic, vinyl, wood or fiberglass spa or hot tub surfaces. If you are unsure of the materials composing your spa or hot tub, check with the manufacturer.
 - Sunlight, water temperature, the number of bathers, and the frequency and duration of spa use all affect the rate of chlorine loss. Adjust the frequency of chlorine applications accordingly.
 - Superchlorination (shock treatment) should be done at least twice a month or more frequently if spa is heavily used. For this purpose use Aqua Chem Shock Treatment for Spas following label directions for Superchlorination below.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in any manner inconsistent with its labeling.

BEFORE YOU BEGIN

- Make sure all spa equipment is working properly including pump, filter, blower and heater. Backwash filter following manufacturer's directions.
- Check spa pH (acidity/alkalinity balance) with an Aqua Chem Test Kit following label directions. Desirable pH range is 7.2-7.6. If pH is low, adjust pH by adding Aqua Chem pH Decreaser to 100 gal. If pH is high, adjust Aqua Chem pH Add to raise pH. Be sure to follow label directions.

HOW USE AQUA CHEM STABILIZED GRANULES FOR ROUTINE SANITIZING

- Check residual chlorine level with an Aqua Chem Test Kit. Desirable range is 1.0-2.0 parts per million (ppm).
- To raise residual chlorine level, add Aqua Chem Stabilized Granules at a rate of 2 tablespoons per 500 gallons by scattering granules over water surface.
- Operate recirculating pump while adding product and for at least 1 hour after ward to ensure even distribution.
- Recheck residual chlorine with test kit. If level is below 1.0 ppm, repeat application until desirable chlorine level of 1.0-2.0 ppm is achieved.
- To maintain desirable chlorine levels, add Stabilized Granules for Spas at a rate of 1 teaspoon per 500 gallons of water whenever residual chlorine levels drop below 1.0-2.0 ppm as measured by a test kit.

FOR SUPERCHLORINATION:

- Add Aqua Chem Stabilized Granules for Spas at a rate of 1/2 teaspoon per 100 gallons of water by scattering granules over water surface following directions above.
- Do not allow bathers to use spa until residual chlorine level is below 1.0 ppm as measured by a test kit.

PRECAUTIONARY STATEMENTS-HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly Corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

STATEMENT OF PRACTICAL TREATMENT (FIRST AID; IF SWALLOWED): Drink promptly a large quantity of water. Do not induce vomiting. Avoid alcohol. Call physician immediately. **IF ON SKIN:** Brush off excess dry chemical. Flush skin with cold water for at least 15 minutes. If irritation persists, obtain medical attention. **IF IN EYES:** Flush with cold water for at least 15 minutes. Obtain medical attention.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

IN THE EVENT OF A MEDICAL EMERGENCY CALL COLLECT: 1-363-823-8776

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds or public waters unless in accordance with an NPDES Permit. For guidance, contact the regional office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS/STRONG OXIDIZING AGENT: Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reuse container. If possible, isolate container in open air or well-ventilated area. Flood with large volumes of water if necessary.

STORAGE AND DISPOSAL: Keep this product in tightly closed original container when not in use. Store in a locked, cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container if possible, and flood area with large amounts of water to dissolve all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not contain in food or feed by storage or disposal or cleaning of equipment.

NOTE: This product is sold by volume. Settling of contents during storage and handling will occur. If you have any questions or comments about Aqua Chem Products or their use, please call us toll free. In the continental U.S. call 1-800-252-7600. Ask for your free Aqua Chem Spa Care Booklet.

PRODUCT DESCRIPTION: Aqua Chem Stabilized Granules for Spas are a convenient way to regulate the chlorine that sanitizes your spa or hot tub. They contain cyanuric acid, a stabilizer which reduces chlorine loss from sunlight and other factors. As granules dissolve, they release sufficient chlorine to reduce the growth of harmful algae and micro organisms, which can multiply to produce unsanitary water conditions if used regularly. No additional stabilizer is needed.

IMPORTANT NOTES

- When using other Aqua Chem products, as outlined in directions for Aqua Chem Stabilized Granules, always follow label directions for these products.
- Aqua Chem Stabilized Granules may cause damage to colored plastic, vinyl, wood or fiberglass spa or hot tub surfaces. If you are unsure of the materials composing your spa or hot tub, check with the manufacturer.
- Sunlight, water temperature, the number of bather, and the frequency and duration of spa use all affect the rate of chlorine loss. Adjust the frequency of chlorine applications accordingly.
- Sanitization (shock treatments) should be done at least once a month, or more frequently if spa is heavily used. For this purpose use Aqua Chem Shock Treatment for Spas following label directions for Sanitization station below.

DIRECTIONS FOR USE

If a violation of Federal Law to use this product in any manner not on extent with its labeling.

BEFORE YOU BEGIN

- Make sure the spa equipment is working properly. Check the pump, filter, heater and water. Rinse spa after following manufacturer's directions.
- Check the water pH. Adjust to 7.2-7.6. Aqua Chem has a pH adjuster. Check the directions. If the pH is 7.2-7.6, you can skip this step. If you are adding Aqua Chem pH adjuster, you should be adding 2 1/2 cups per 500 gallons of water. Do not use other pH adjusters.

NOW USE AQUA CHEM STABILIZED GRANULES FOR ROUTINE SANITIZING

- Measure 2 1/2 cups of granules with an Aqua Chem 1/2 cup measuring cup. Add 2 1/2 cups per 500 gallons.
- Turn on the pump. Allow the water to circulate for 15 minutes. Add 2 1/2 cups per 500 gallons. Do not use other pH adjusters.
- Turn on the pump. Allow the water to circulate for 15 minutes. Add 2 1/2 cups per 500 gallons. Do not use other pH adjusters.
- Turn on the pump. Allow the water to circulate for 15 minutes. Add 2 1/2 cups per 500 gallons. Do not use other pH adjusters.
- Turn on the pump. Allow the water to circulate for 15 minutes. Add 2 1/2 cups per 500 gallons. Do not use other pH adjusters.

FOR SUPPLEMENTAL INFORMATION

- For 2 1/2 cups of granules per 500 gallons of water, you will need 1 1/2 cups of granules per 250 gallons of water. Do not use other pH adjusters.
- For 2 1/2 cups of granules per 500 gallons of water, you will need 1 1/2 cups of granules per 250 gallons of water. Do not use other pH adjusters.
- For 2 1/2 cups of granules per 500 gallons of water, you will need 1 1/2 cups of granules per 250 gallons of water. Do not use other pH adjusters.
