Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 7368-37

PRODUCT DESCRIPTION: Aqua Chem Stabilized Granules for Spas are a convenient way to regulate the chlorine that sanitizes your spa or hot tub. They contain cyanuric acid, a stabilizer which reduces chlorine loss from sunlight and other factors. As granules dissolve, they release sufficient chlorine to reduce the growth of harmful algae and microorganisms which can multiply to produce unsightly water conditions. If used regularly, no additional stabilizer is needed.

IMPORTANT NOTES:

- When using other Aqua Chem products, as outlined in directions for each Aqua Chem Stabilized Granules, always follow label directions for these products.
- Aqua Chem Stabilized Granules may cause damage to colored plastic, vinyl, wood or fiberglass spa or hot tub surfaces. If you are unsure of the materials composing your spa or hot tub, check with the manufacturer.
- Sunlight, water temperature, the number of bather, and the frequency and duration of spa use all affect the rate of chlorine loss. Adjust the frequency of chlorine applications accordingly.
- Superchlorination (shock treatment) should be done at least twice a month or more frequently if spa is heavily used. For this purpose use Aqua Chem Shock Treatment for Spas following label directions for Superchlorination below.

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in any manner inconsistent with its labeling.

BEFORE YOU BEGIN:

- Make sure all spa equipment is working properly, including pump, filter, chamber and heater. Backwash filter following manufacturer's directions.
- Check water pH. Acidity balances with an Aqua Chem Test Kit following label directions. Desirable pH range is 7.4 - 7.6. If necessary, adjust pH by adding Aqua Chem pH Decreaser to lower pH or by adding Aqua Chem pH Add to raise pH. Be sure to follow label directions.

HOW USE AQUA CHEM STABILIZED GRANULES FOR ROUTINE SANITIZING:

- Check residual chlorine level with an Aqua Chem Test Kit. Desirable range is 1.0 - 2.0 parts per million (ppm).
- To raise residual chlorine level, add Aqua Chem Stabilized Granules at a rate of 2 tablespoons per 500 gallons by scattering granules over water surface.
- Operate recirculating pump while adding product and for at least 1 hour after you're done adding each distribution.
- After each residual chlorine test kit, if level is below 1.0 ppm, repeat application until desirable chlorine level of 1.0 - 2.0 ppm is achieved.
- To maintain desirable chlorine levels, add Stabilized Granules for Spas at a rate of 1 tablespoon per 500 gallons of water whenever residual chlorine levels drop below 1.0 - 2.0 ppm as measured by a test kit.

FOR SUPERCHLORINATION:

- Add Aqua Chem Stabilized Granules for Spas at a rate of 6 tablespoons per 500 gallons of water by scattering granules over water surface following directions above.
- Use 100+ bather to use spa until residual chlorine level is below 1.0 ppm as measured by a test kit.

PRECAUTIONARY STATEMENTS - HAZARDS TO HUMANS AND DOMESTIC ANIMALS:

DANGER: Highly Corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

STATEMENT OF PRACTICAL TREATMENT (FIRST AID): IF SWALLOWED:

Drink promptly a large quantity of water. Do not induce vomiting. Avoid alcohol. Call physician immediately if ill. **IF IN EYES:** Flush with copious dry chemical. Flush skin with cold water for at least 15 minutes. If irritation persists, obtain medical attention. **IF IN EYES:** Flush with cold water for at least 15 minutes. Obtain medical attention.

NOTE TO PHYSICIANS: Probable mucosal damage may contraindicate the use of gastric lavage.

**IN THE EVENT OF A MEDICAL EMERGENCY
CALL COLLECT 1-200-923-8716**

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds or public waters unless in accordance with an NPDES Permit. For guidance, contact the regional office of the EPA.

PHYSICAL AND CHEMICAL HAZARD/STORAGE DANGERS AVOID: Mix only with water. Use clean dry utensils. Do not add this product to any dispersing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reuse container. If possible, isolate container in open air or well-ventilated area. Flood with large volumes of water if necessary.

STORAGE AND DISPOSAL: Keep this product in tightly closed original container when not in use. Store in a locked, cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, empty container if possible) and flood bag with large amounts of water to dissolve all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not contain, load or feed by storage of disposal or cleaning of equipment.

NOTE: This product is sold by weight. Settling of contents during storage and handling will occur. If you have any questions or comments about Aqua Chem Products or their use, please call us toll free to the attention of S. call 1-800-THE-POOL. Ask for your free test kit and spa care booklet.
