DIRECTIONS FOR USE

Use of this product in any manner inconsistent with its labeling is a violation of Federal Law

PRODUCT DESCRIPTION: Aqua Chem™ Spa Algicide is an effective product for reducing growth of algae and microorganisms in spas and hot tubs. Aqua Chem Spa Algicide is designed for regular maintenance treatment, not for removal of heavy algae growths. This product is compatible with other water treatment chemicals.

IMPORTANT NOTES

- 1 Do not mix Aqua Chem Spa Algicide with concentrated dry or liquid chlorinating products.
- 2 Sunlight exposure, temperature, bather load and frequency of spa use all affect the rate at which unsanitary spa conditions develop. Always adjust spa cleaning and maintenance functions and schedules according to your specific circumstances.

HOW TO USE AQUA CHEM SPA ALGICIDE

- 1 Before using any water treatment chemicals, check to ensure all spa equipment is working properly including pump, filter, blower and heater.
- 2 Backwash filter, following normal procedure for your spa's filter.
- 3 Check water pH (acidity/alkalinity balance) with an Aqua Chem test kit following label directions. Desired pH range is 7.4-7.6. If necessary, adjust pH by adding Aqua Chem Spa pH Decreaser to lower pH, or Aqua Chem Spa pH Increaser to raise pH. Follow label directions for these products.
- 4 Recheck pH and maintain it between 7.4-7.6 for at least 6 hours before adding Aqua Chem Spa Algicide.
- 5 To remove existing algae where growth has become visible, add Aqua Chem Spa Algicide at a rate of 10-15 fluid ounces per 1,000 gallons of water by pouring algicide into water with recirculating pump operating. Operate pump for 1 hour after addition of Aqua Chem Spa Algicide to ensure even distribution and maximum effect. If necessary, turn spa or hot tub surtains the following day to dislodge dead algae for removal by unit's filter.
- 6 For algicide treatment of freshly cleaned and filled spa or hot tub, add Aqua Chem Spa Algicide at a rate of 7-10 fluid ounces per 1,000 gallons of water by pouring it into

water while recirculating pump is operating. Continue to operate pump for 1 hour to ensure even distribution and maximum effect.

- 7 To maintain water free of algae and microorganisms, add Aqua Chem Spa Algicide at a rate of 2-5 fluid ounces every 5-7 days, or more frequently depending on unit sunlight exposure, bather load and frequency of bather use.
- 8 Recheck pH, total alkalinity, and available chlorine levels following treatment with Aqua Chem Spa Algicide and adjust as necessary, following label directions on Aqua Chem Spa products designed for these purposes.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing.

FIRST AID: If swallowed, promptly drink a large quantity of milk, egg whites, gelatin solution, or, if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams, or ponds. Permits may be required for discharges containing this pesticide into lakes, streams, ponds, or public waters. For guidance, contact the regional office of the Environmental Protection Agency.

STORAGE AND DISPOSAL: Keep this product in its tightly closed original container when not in use. Store in a locked, cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed - storage or disposal, or cleaning of equipment.

If you have any questions or comments about Aqua Chem Products or their use, please call us toll free, in the continental U.S., call 1-800-232-POOL.
