

PRODUCT DESCRIPTION. Aqua Chem Algaecide for Spas efficiently and economically reduces the growth of algae and macro-organisms in spas and hot tubs. It is designed for use as part of your routine maintenance program. Not for removal of heavy algae growths. This product is compatible with other water treatment chemicals.

IMPORTANT NOTES

- 1 Do not mix Aqua Chem Algaecide for Spas with concentrated dry or liquid chlorinating products. Fire or explosion could result.
- 2 Sunlight, water temperature, number of bathers and frequency of spa use all affect the rate at which unsanitary water conditions develop. Adjust chemical treatment applications according to usage conditions.

DIRECTIONS FOR USE.

It is a violation of Federal Law to use this product in any manner inconsistent with its labeling.

BEFORE YOU BEGIN

- 1 Make sure all spa equipment is working properly including pump, filter, slammer and heater. Backwash filter following manufacturer's directions.
- 2 Check water pH (acidity/alkalinity balance) with an Aqua Chem Test Kit following label directions. Desired pH range is 7.4-7.6. If necessary, adjust pH by adding Aqua Chem pH Decreaser to lower pH or Aqua Chem pH Add to raise pH. Be sure to follow label directions.
- 3 Recheck pH and maintain it between 7.4-7.6 for at least 6 hours before adding Aqua Chem Algaecide for Spas.

HOW USE AQUA CHEM ALGAECIDE FOR SPAS

- 1 To remove existing algae where growth has become visible, add Algaecide at a rate of 10-15 fl. oz. per 1,000 gallons of water by pouring it into water.
- 2 Operate recirculating pump while adding product and for 1 hour afterward to ensure even distribution and maximum effect.
- 3 For newly cleaned and filled spas or hot tubs, add Algaecide at a rate of 7-10 fl. oz. per 1,000 gallons of water by pouring it into water. Operate recirculating pump while adding product and for one hour afterward.
- 4 To reduce future growth of algae and micro-organisms, a regular maintenance application of this algaecide is recommended. Add Algaecide at a rate of 2-5 fl. oz. every 5-7 days or more frequently depending on usage conditions following directions above.

ALGAECIDE FOR SPAS

NOTIFICATION
 LABEL NOT REMOVED
 WHEN PH NOTICE 84-4
 JUN 12 1990

PRODUCT DESCRIPTION: Aqua Chem Algaecide is an efficient and economical algicide that kills algae and microorganisms in spas and hot tubs. It is intended for use as part of your routine maintenance program, not for removal of heavy algae growth. This product is compatible with other water treatment treatments.

IMPORTANT NOTES

1. Do not use Aqua Chem Algaecide in spas which are untreated by a liquid chemical. Liquid products like bromine can void the use.
2. Turn off water temperature control for 24 hours and the quantity of spa use to effect the rate at which secondary water and fumes develop. Adjust chemical treatment applications according to usage and conditions.

DIRECTIONS FOR USE

This is a portion of Federal law for use of this product in any manner not stated with this label.

BEFORE YOU BEGIN

1. Make sure the spa is clean and free of debris, including dirt, oil, hair, skin, and other debris. Rinse with the following manufacturer's instructions.
2. Test the water pH. If the pH is not between 7.4 and 7.6, add Aqua Chem pH Adjuster to bring the pH into the correct range. If the pH is below 7.4, add Aqua Chem pH Increaser to raise the pH. If the pH is above 7.6, add Aqua Chem pH Decreaser to lower the pH. Be sure to follow the label directions.
3. Recheck pH and maintain between 7.4 and 7.6 for at least 6 hours before adding Aqua Chem Algaecide for Spas.

NOW USE AQUA CHEM ALGAECIDE FOR SPAS

1. To use on existing algae where you are not treating with a pump, add Algaecide at a rate of 1.0 to 1.5 oz per 1,000 gallons of water by pouring it into water.
2. To use on existing algae where you are treating with a pump, add Algaecide at a rate of 1.0 to 1.5 oz per 1,000 gallons of water by pouring it into water. Continue to run the pump while adding product for 15 to 30 minutes after use.
3. To reduce future algae growth, add Algaecide at a rate of 1.0 to 1.5 oz per 1,000 gallons of water by pouring it into water. Continue to run the pump while adding product for 15 to 30 minutes after use.
4. To reduce future algae growth, add Algaecide at a rate of 1.0 to 1.5 oz per 1,000 gallons of water by pouring it into water. Continue to run the pump while adding product for 15 to 30 minutes after use.

5. Recheck pH, total alkalinity, and total hardness even after 24 hours of treatment and adjust as necessary. Rinsing after 24 hours with Aqua Chem Spa products designed for these purposes.

PRECAUTIONARY STATEMENTS - HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing.

FIRST AID: If swallowed, promptly drink a large quantity of milk, egg whites, or plain water. If these are not available, drink quantities of water. Avoid alcohol and a physician immediately.

**IN THE EVENT OF A MEDICAL EMERGENCY
 CALL COLLECT 1 800 623 5116**

ENVIRONMENTAL HAZARDS: This best code is toxic to fish. Keep out of lakes, streams, ponds, rivers, and other water bodies. Do not discharge into streams, ponds, and other waters. For guidelines, consult the regional office of the Environmental Protection Agency.

STORAGE AND DISPOSAL: Keep this product in its original container. Do not use if the container is damaged, rusted, or leaking. Do not use if the container is open flame. In case of fire, remove the container if possible and flood area with large amounts of water to dissolve all materials before discharging. Containers should not be reused or refilled or otherwise altered. Do not contaminate food or feed by storage or disposal. Clean up equipment.
