Algaecide

FOR FAST ALGAE CONTROL
NON-FOAMING

ACTIVE INGREDIENT: Poly (oxyethylene)
ethylene (dimethylamine) ethylene diethanolamine
INERT INGREDIENTS:

KEEP OUT OF REACH OF CHILDREN
CAUTION Harmful if swallowed
additional precautions and first aid

NET CONTENTS 16 FL OZ

ALGAEICIDE
FOR SPAS

PRODUCT DESCRIPTION: Aqua Chem® Algaecide for Spas efficiently and economically reduces the growth of algae and micro-organisms in spas and hot tubs. It is designed for use as part of your routine maintenance program, not for removal of heavy algae growth. This product is compatible with other water treatment chemicals.

IMPORTANT NOTES

- 1 Do not mix Aqua Chem Algaecide for Spas with concentrated dry or liquid chlorinating products. Fire or explosion could result.
- 2 Sunlight, water temperature, number of bathers and frequency of use may all affect the rate at which unsightly water conditions develop. Adjust chemical treatment applications according to usage conditions.

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in any manner inconsistent with its labeling.

BEFORE YOU BEGIN

- 1 Make sure all spa equipment is working properly including pump, filter, blower and heater. Backwash filter following manufacturer's directions.
- 2 Check water pH (acidity/alkalinity balance) with an Aqua Chem Test Kit following label directions. Desired pH range is 7.4-7.6. If necessary, adjust pH by adding Aqua Chem pH Decreaser to lower pH, or Aqua Chem pH Add to raise pH. Be sure to follow label directions.
- 3 Recheck pH and maintain it between 7.4-7.6 for at least 6 hours before adding Aqua Chem Algaecide for Spas.

HOW TO USE AQUA CHEM ALGAEICIDE FOR SPAS

- 1 To remove existing algae where growth has become visible, add Algaecide at a rate of 10-15 fl oz per 1,000 gallons of water by pouring it into water.
- 2 Operate recirculating pump while adding product and for 1 hour afterward to ensure even distribution and maximum effect.
- 3 For newly cleaned and filled spas or hot tubs, add Algaecide at a rate of 7-10 fl oz per 1,000 gallons of water by pouring it into water. Operate recirculating pump while adding product and for one hour afterward.
- 4 To reduce future growth of algae and micro-organisms, a regular maintenance application of this Algaecide is recommended. Add Algaecide at a rate of 2-5 fl oz every 5-7 days or more frequently depending on usage conditions, following directions above.

Grow Group, Inc.
250 ALM Avenue
City of Commerce, California 90040

- 5 Recheck pH, total alkalinity and residual chlorine levels following treatment and adjust as necessary following label directions on Aqua Chem Spa products designed for these purposes.

PRECAUTIONARY STATEMENTS. HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing.

FIRST AID: If swallowed, promptly drink a large quantity of milk, egg whites, gelatin solution or, if these are not available, drink quantities of water. Avoid alcohol. Call a physician immediately.

IN THE EVENT OF A MEDICAL EMERGENCY
CALL COLLECT: 1-800-623-5710

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams, or ponds. Permits may be required for discharges containing this pesticide into lakes, streams, ponds, or public waters. For guidance, contact the regional office of the Environmental Protection Agency.

STORAGE AND DISPOSAL: Keep this product in tightly closed original container when not in use. Store in a locked, cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage or disposal or cleaning of equipment.

If you have any questions or comments about Aqua Chem Products or their use, please call or toll free, in the continental U.S., call 1-800-232-5689.
