

**PRECAUTIONARY STATEMENTS:  
HAZARDS TO HUMANS AND  
DOMESTIC ANIMALS**

**CAUTION:** Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing.

**FIRST AID:** If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or, if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

**ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish. Keep out of lakes, streams, or ponds. Permits may be required for discharges containing this pesticide into lakes, streams, ponds, or public water. For guidance, contact the regional office of the Environmental Protection Agency.

**STORAGE AND DISPOSAL:** Keep container closed when not in use. Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. Do not reuse empty container. Triple rinse (or equivalent) and dispose of container in an incinerator or in an approved landfill, or bury in a safe place. Rinsate that cannot be used or reprocessed should be disposed of in a landfill approved for pesticides or buried in a safe place away from water supplies. Open dumping is prohibited.

**NET CONTENTS 32 FL. OZ. (1 QT.)**

**DIRECTIONS FOR USE  
GENERAL CLASSIFICATION**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

AQUA CHEM ALGAEWAY® 60 algicide is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing a heavy growth of algae should be cleaned prior to using AQUA CHEM ALGAEWAY 60.

For pools having just visible algae growth add an initial dose of 11 to 17 fl. oz. of AQUA CHEM ALGAEWAY 60 per 10,000 gal. of water and remove settled algae debris by cleaning.

For treatment of a freshly cleaned and filled pool, add initially 6 to 11 fl. oz. of AQUA CHEM ALGAEWAY 60 per 10,000 gal. of water.

To maintain pools free of visible algae growth subsequent additions of 2 to 4 fl. oz. of AQUA CHEM ALGAEWAY 60 per 10,000 gal. of water should be made every 5 to 7 days after the initial treatment.

Uniform distribution of AQUA CHEM ALGAEWAY 60 throughout the water in the pool is necessary for maximum effectiveness.

AQUA CHEM ALGAEWAY 60 is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. AQUA CHEM ALGAEWAY 60 can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix AQUA CHEM ALGAEWAY 60 with dry or concentrated liquid chlorine products.

**IMPORTANT NOTICE**

1. For treatment of stubborn black algae spots, use AQUA CHEM BLACK-OUT® algicide.
2. Before using in plastic, vinyl, or freshly plastered pools check with manufacturer for staining potential.
3. Always apply pool chemicals separately. Never combine them.

\*Follow directions for use on labels of these AQUA CHEM products.
