

DIRECTIONS FOR USE

Use of this product in any manner inconsistent with its labeling is a violation of Federal Law

PRODUCT DESCRIPTION: Aqua Chem™ Algicide Liquid is an effective product for routine removal and prevention of algae and microorganism growths in swimming pool water following initial use of Aqua Chem Algicide Liquid. regular maintenance applications every 5-7 days will help prevent growth of algae and microorganisms when used as directed under normal conditions

IMPORTANT NOTES

- 1 For removal of black algae, use Aqua Chem Black-Out™ Algicide
- 2 Aqua Chem Algicide Liquid may cause staining on plastic, vinyl or freshly plastered pool surfaces. Check with pool manufacturer or supplier before using this product
- 3 Always apply this and other pool treatment chemicals separately, never in combination
- 4 Sunlight exposure, bather load and frequency of pool use all affect the rate at which unsanitary pool water conditions develop. Always adjust pool cleaning and maintenance functions and schedules according to your specific circumstances

HOW TO USE AQUA CHEM ALGICIDE LIQUID

- 1 Before using any water treatment chemicals, check to ensure all pool equipment is working properly including pump, filter, skimmer and heater
- 2 Check residual chlorine level with an Aqua Chem Test Kit, following kit directions. Correct range is 1.0-1.5 parts per million parts of water (ppm). Adjust, if necessary, by adding appropriate amounts of your regular Aqua Chem chlorinating product, following product label directions
- 3 Backwash pool filter, using normal procedure for your installation
- 4 Check pH (acidity/alkalinity balance) with an Aqua Chem Test Kit, again following kit directions. Desired pH range is 7.2-7.6. If necessary, adjust pH by using Aqua Chem pH Decreaser to lower pH, or Aqua Chem pH Increaser to raise pH. Follow product label directions for use
- 5 Recheck pH and maintain it between 7.2-7.6 for at least 6 hours before adding Aqua Chem Algicide Liquid
- 6 To reduce algae growth, add Aqua Chem Algicide Liquid at a rate of 11-17 fluid ounces per 10,000 gallons of water by pouring algicide into water at deep end of pool. Avoid chemical contact with skin or eyes. Wear goggles or face shield. Remove and wash contaminated clothing before reuse. See first aid information elsewhere on label
- 7 Operate recirculating pump and filter during addition of Algicide Liquid and for 4 hours thereafter to ensure even distribution and maximum effect of algicide

AQUA CHEM IS A TRADEMARK OF GEORGIA PACIFIC CORPORATION

- 8 Following pump/filter 4-hour cycle, remove dead algae from pool surfaces by brushing and vacuuming as needed. If necessary, repeat treatment outlined above to remove any remaining algae
- 9 When pool surfaces are clean and free of algae growth, add Aqua Chem Algicide Liquid at a rate of 2-4 fluid ounces per 10,000 gallons of water, following user directions above. Operate pump for 4 hours to ensure even distribution. This maintenance dose should be administered immediately after algae removal and about once every 5-7 days under normal conditions to retard growth of algae and microorganisms, and more frequently under heavier bather loads or when algae spots appear more quickly
- 10 Always recheck pH with Aqua Chem Test Kit and readjust if necessary, as noted in Direction #3 above before reentering pool

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing.

FIRST AID: If swallowed: Promptly drink a large quantity of milk, egg whites, gelatin solution, or, if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams, or ponds. Permits may be required for discharges containing this pesticide into lakes, streams, ponds, or public water. For guidance, contact the regional office of the Environmental Protection Agency.

STORAGE AND DISPOSAL: Keep this product in tightly closed original container, when not in use. Store in a locked, cool, dry well-ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage or disposal or cleaning of equipment.
