

PRODUCT DESCRIPTION Aqua Chem Algacide Liquid Concentrate is an extra strength algicide specifically formulated to destroy blue, green, yellow, and white algae infections in pool water. Following its initial application, Aqua Chem Algacide Liquid Concentrate will help prevent algae growth when used every 5-7 days as part of your normal maintenance program.

IMPORTANT NOTES

1. Aqua Chem Algacide Liquid may stain plastic, vinyl, or heavily plastered pool surfaces. Check with pool manufacturer or Supplier before using this product.
2. Always apply this and other pool treatment chemicals separately, never combine them.
3. Consult a pool's long-term number of swimmers and frequency of pool use, all other factors which affect pool water conditions, and use of other pool cleaning and maintenance chemicals accordingly.
4. For removal of black algae, use Aqua Chem Black Out Algicide.

DIRECTIONS FOR USE

Use as a part of your normal pool maintenance program. See the label for use instructions.

BEFORE YOU BEGIN

1. Make sure all pool equipment is working properly, including pump, filter, heater, and heater.
2. Backwash filter following normal procedure for your pool's filter.
3. Check and adjust chlorine level with 30 Aqua Chem Test Kit following label directions. Do not raise chlorine to 5 parts per million (ppm) if necessary, add Aqua Chem Stabilized Granules or Aqua Chem Liquid Chlorine according to label directions. Do not raise to a level above 5 ppm.
4. Check pH level, alkalinity balanced with 30 Aqua Chem Test Kit following label directions. Do not raise pH to 7.8. If necessary, adjust pH by adding Aqua Chem pH Decreaser to lower pH or Aqua Chem pH Add to raise pH. Follow label directions for these products.
5. Reduce pH and alkalinity to between 7.2-7.6 for at least 6 hours before adding Aqua Chem Algacide.

NOW USE AQUA CHEM ALGAEICIDE LIQUID CONCENTRATE

1. Add Aqua Chem Algacide Liquid at a rate of 1.1-1.2 fl. oz. per 10,000 gallons of water by pouring algicide into skimmer at deep end of pool. Wear goggles or face shield and rubber gloves. Also avoid contamination of clothing. (See First Aid information elsewhere on label.)
2. Operate recirculating pump while adding Aqua Chem Algacide Liquid and for 3 hours thereafter to ensure even plate distribution and maximum effect.
3. If necessary, the next day, brush dead algae off pool

Denver, Colorado 80231

surfaces so it can be filtered away. Repeat dosage to remove additional algae spots.

1. To reduce future growth of algae and mold organisms, a regular maintenance application of the algicide is recommended. Add Algacide Liquid at a rate of 2-4 fl. oz. every 5-7 days, or more frequently depending on usage conditions, following directions above.
2. Recheck pH, total alkalinity, and residual chlorine by following treatment and adjust as necessary, following label directions on Aqua Chem San products designed for these purposes.

PRECAUTIONARY STATEMENTS - HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing.

STATEMENT OF PRACTICAL TREATMENT (FIRST AID) IF SWALLOWED Feed victim large quantity of milk, egg whites, or plain solution. Drink large quantity of water if none of these are available. Act on throat. Call physician immediately. **IF IN EYES** Wash thoroughly with large quantities of water and obtain medical attention immediately. **IF ON SKIN** Wash thoroughly with water. If irritation persists, obtain medical attention.

IN THE EVENT OF A MEDICAL EMERGENCY CALL COLLECT 1-303-623-5716

ENVIRONMENTAL HAZARDS This pesticide is toxic to fish. Keep out of lakes, streams, or ponds. Pesticide may be required for discharge containing this pesticide into lakes, streams, ponds, or public water. For guidance contact the regional office of the Environmental Protection Agency.

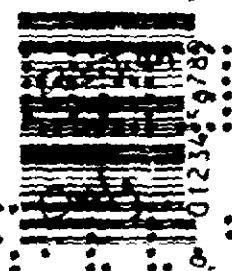

STORAGE AND DISPOSAL Keep this product in tight, closed original container, away from water. Store in a locked and fire well ventilated area away from heat or open flame. In case of decay, combine contents in a container of possible and then deal with large amounts of it. Do not reuse or discard all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage or disposal or cleaning of equipment.

PRODUCT DESCRIPTION: Aqua Chem Algaecide Liquid Concentrate is an extra-strength algaecide specially formulated to destroy blue, green, yellow and mustard algae infestations in pool water. Following its initial application, Algaecide Liquid Concentrate will help prevent algae growth when used every 5-7 days as part of your routine maintenance program.

IMPORTANT NOTES

- 1 Aqua Chem Algaecide Liquid may stain plastic, vinyl or freshly plastered pool surfaces. Check with pool manufacturer or supplier before using this product.
- 2 Always apply this and other pool treatment chemicals separately, never combine them.
- 3 Sunlight, rainfall, temperature, number of swimmers and frequency of pool use all affect the rate at which unsanitary pool water conditions develop. Always adjust pool cleaning and maintenance functions accordingly.
- 4 For removal of black algae, use Aqua Chem Black Out Algaecide.

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in any manner inconsistent with its labeling.

BEFORE YOU BEGIN

- 1 Make sure all pool equipment is working properly including pump, filter, skimmer and heater.
- 2 Backwash filter following normal procedure for your pool's filter.
- 3 Check residual chlorine level with an Aqua Chem Test Kit following label directions. Desirable range is 1.0-1.5 parts per million (ppm). If necessary, add Aqua Chem Stabilized Granules or Aqua Chem Liquid Chlorinator according to label directions till water reaches desired level.
- 4 Check pH (acidity/alkalinity balance) with an Aqua Chem Test Kit following label directions. Desired pH range is between 7.2-7.6. If necessary, adjust pH by adding Aqua Chem pH Decreaser to lower pH or Aqua Chem pH Add to raise pH. Follow label directions for these products.
- 5 Recheck pH and maintain it between 7.2-7.6 for at least 6 hours before adding Aqua Chem Algaecide.

HOW TO USE AQUA CHEM ALGAECIDE LIQUID CONCENTRATE

- 1 Add Aqua Chem Algaecide Liquid at a rate of 11-17 fl oz per 10,000 gallons of water by pouring Algaecide into water at deep end of pool. Wear goggles or face shield and rubber gloves. Also avoid contamination of clothing. (See First Aid information elsewhere on label.)
- 2 Operate recirculating pump while adding Aqua Chem Algaecide Liquid and for 4 hours afterward to ensure complete distribution and maximum effect.
- 3 If necessary the next day brush dead algae off pool

- surfaces so it can be filtered away. Repeat dosage to remove all dead algae spots.
- 4 To reduce future growth of algae and micro-organisms a regular maintenance application of this algaecide is recommended. Add Algaecide Liquid at a rate of 2-4 fl oz every 5-7 days or more frequently depending on usage conditions. Follow directions above.
- 5 Recheck pH, total alkalinity and residual chlorine levels following treatment and adjust as necessary following label directions on Aqua Chem Salt products designed for these purposes.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes or clothing.

STATEMENT OF PRACTICAL TREATMENT (FIRST AID):
IF SWALLOWED: Feed victim large quantity of milk, egg whites, or grain solution, drink large quantity of water if none of these are available. Avoid alcohol. Call physician immediately. **IF IN EYES:** Wash thoroughly with large quantities of water and obtain medical attention immediately. **IF ON SKIN:** Wash thoroughly with water. If irritation persists, obtain medical attention.

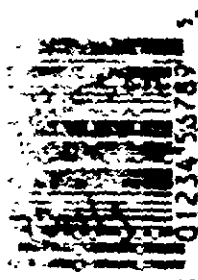

**IN THE EVENT OF A MEDICAL EMERGENCY
CALL COLLECT: 1-363-623-5718**

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams or ponds. Permits may be required for discharges containing this pesticide into lakes, streams, ponds or public water. For guidance, contact the regional office of the Environmental Protection Agency.

STORAGE AND DISPOSAL: Keep this product in tightly closed original container when not in use. Store in a locked cool dry well ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage or disposal of decomposition.
