DIRECTIONS FOR USE

PRODUCT DESCRIPTION: This product is a dry chlorine compound used for the treatment of swimming pools. It is a white powder that dissolves in water to form a solution of hypochlorous acid. The active ingredient is available as a dry granule. The product is used to maintain a residual chlorine level in the water of 1.0 to 1.5 ppm. The product is also used to shock treat pools to destroy bacteria and algae. The product is not to be used in hot tubs or spas.

IMPORTANT NOTES:

1. After using the product, the container should be kept tightly closed to prevent moisture from entering. The container should be stored in a cool, dry place.
2. Avoid contact with eyes, skin, and clothing. If contact occurs, flush with water for at least 15 minutes. If contact with eyes occurs, seek medical attention.
3. Do not use the product in hot tubs or spas.

TO SHOCK TREAT (SUPERCHLORINATE) POOL WATER:

1. Before using the product, the pool should be cleaned and the water should be tested for pH and total alkalinity.
2. The amount of product to use depends on the volume of water in the pool. For a 10,000 gallon pool, use 1.5 pounds of product per 1.0 ppm of residual chlorine.
3. The product should be added to the pool in a bucket and stirred into the water. The pool should be covered and the water should be tested for residual chlorine after 24 hours.
4. The residual chlorine level should be maintained at 1.0 to 1.5 ppm.

If you have any questions or comments about Aqua-Chem Products or their use, please call us toll free in the continental U.S. Call 1-800-252-7000.

SAMPLE
SPECIAL SATISFACTION

FOR ROUTINE CHLORINATION OF POOL WATER:

1. Before using the water testing kit, be sure the kit and all pool equipment is working properly, including pump, filter, skimmer, and heater.
2. Test the water pH and total alkalinity daily. Adjust pH and total alkalinity as necessary. Follow label directions for each of these products.
3. Add the product to the pool water. The amount to add depends on the volume of water in the pool and the current residual chlorine level. The product should be added to the pool in a bucket and stirred into the water. The pool should be covered and the water should be tested for residual chlorine after 24 hours.
4. The residual chlorine level should be maintained at 1.0 to 1.5 ppm.

PRACTICAL TREATMENT (FIRST AID):

1. If you get the product in your eyes, flush with water for at least 15 minutes while removing contaminated clothing and shoes. For eye irritation, get medical attention.
2. If you get the product on your skin, flush with water for at least 15 minutes. If you have a severe reaction, get medical attention.
3. If you get the product on your clothing, remove the clothing and shoes before they dry.

PRECAUTIONARY STATEMENTS, HAZARDS TO HUMANS AND DOMESTIC ANIMALS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: Irritation to nose and throat. Wear goggles or face shield and gloves when handling. Avoid breathing dust. Remove and wash contaminated clothing and shoes before reuse.

ENVIRONMENTAL HAZARDS: This product may be harmful if it reaches fresh water streams, ponds or public waters unless in accordance with the label directions. Do not discharge into the environment.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: May irritate skin. Use only a clean, dry utensil made of metal. Do not use the product in hot tubs or spas. Do not add the product to any swimming pool that contains a hot tub or spa. Do not use the product in hot tubs or spas.

STORAGE AND DISPOSAL: READ BEFORE USING

Keep in original container in a cool, dry place. Keep container closed when not in use. Keep away from heat sources, sparks, open flames, and highly oxidized products. Use only a clean, dry utensil made of metal or plastic such as the Aqua-Chem Shock Treatment Dry Chlorinator is taken from the container. Do not reuse container. Residual material remaining in empty drum can react to cause fire. Thoroughly flush empty container with water then destroy by placing in trash collection.

Residues resulting from the use of this product may be disposed of on site or at an approved hazardous waste facility. Do not contaminate water, food, or feed by storage or disposal.

IN CASE OF FIRE: - Flush with water. Aqua-Chem Shock Treatment Dry Chlorinator supplies oxygen. Therefore, attempts to smother fire with a wet bag, wet carbon dioxide, or a dry chemical extinguisher are ineffective.

IN CASE OF SPILL OR LEAK: - Use extreme caution. Contamination may cause fire or violent reaction if fire or reaction occurs in area of spill. Flush with plenty of water. Otherwise, sweep up spilled material using a clean, dry shovel and broom and dispose spilled material in water. Then immediately use solution as directed.
