AQUA CHEM^(R)
Balanced For Clean Pools
ALGAECIDE GRANULES
FOR FAST ALGAE CONTROL

ACCEPTED
MAY 31 1990
Under the Federal Insecticide,
Fungicide, and Rodenticide Act,
as amended, for the pesticide
registered under
EPA Reg. No. 7348-68

ACTIVE INGREDIENT: *Lithium Hypochlorite 29%
INERT INGREDIENTS: 71%
***Available Chlorine 35%**

KEEP OUT OF REACH OF CHILDREN

DANGER: Highly corrosive. Read additional precautions and first aid on back panel.

NET WT 56 OZ (3 1/2 LB)

ALGAECIDE

NOTE: Label Code, 60-L2531, 9/90

(4/9/90)

BACK PANEL (COLUMN 1)

PRODUCT DESCRIPTION: Aqua Chem^(R) Algaecide Granules are a potent way to destroy algae and bacteria growth. Their quick-dissolving granular form makes this product safe to use on most surfaces under normal conditions, when used as directed.

IMPORTANT NOTES

1. For vinyl or colored plastered pools, mix Aqua Chem Algaecide Granules with water in a plastic container. Allow granules to dissolve, then pour concentrated solution into pool, preferably at deep end.
2. Sunlight, rainfall, temperature, number of swimmers and frequency of pool use all affect the rate at which unsanitary pool water conditions develop. Adjust the frequency of chlorine applications and pool maintenance accordingly.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in any manner inconsistent with its labeling.

BEFORE YOU BEGIN

1. Make sure all pool equipment is working properly, including pump, filter, skimmer and heater.
2. Backwash filter following manufacturer's directions.
3. Check water pH (acidity/alkalinity balance) with an Aqua Chem Test Kit following label directions. Water pH should be 7.2-7.6. If not, adjust by adding Aqua Chem pH Decreaser to lower pH or Aqua Chem pH Add to raise pH. Be sure to follow product directions.
4. Recheck pH and maintain it between 7.2-7.6 for at least 6 hours before adding Aqua Chem Algaecide Granules.

NOW USE ALGAECIDE GRANULES:

TO REMOVE EXISTING ALGAE GROWTH:

1. Add Aqua Chem Algaecide Granules at a rate of 2 cups (16 fl.oz.) per 5,000 gallons of pool water by scattering granules over water surface at deep end of pool. Wear goggles or face shield and rubber gloves. Also avoid contamination of clothing. (See First Aid information elsewhere on this label.)
2. Operate recirculating pump when adding granules and for 6 hours thereafter to ensure even distribution of chemical in water.
3. Wait approximately 24 hours, then brush dead algae from pool walls and bottom, and remove any remaining algae spots.

BACK PANEL (CONT.)

4. Following algae removal, recheck pH and adjust if necessary, following directions outlined above.
5. Check residual chlorine level with an Aqua Chem Test Kit. Do not allow swimmers in pool until residual chlorine level is no more than 3.0 parts per million (ppm) or below.

TO PREVENT ALGAE GROWTH:

1. Superchlorinate (shock treat) pool water once every 2-4 weeks, using Aqua Chem Shock Treatment. Follow label directions for this product.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

STATEMENT OF PRACTICAL TREATMENT (FIRST AID): IF SWALLOWED: Feed victim bread soaked in milk, followed by olive oil or cooking oil. Call a physician immediately. IF ON SKIN: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. IF IN EYES: Flush with cold water for at least 15 minutes. Get medical attention.

IN THE EVENT OF A MEDICAL EMERGENCY

CALL COLLECT: 1-303-623-5716

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance, contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS/STRONG OXIDIZING AGENT: Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

BACK PANEL (COLUMN 2)

STORAGE AND DISPOSAL: Keep this product in tightly closed original container when not in use. Store in a locked, cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage or disposal, or cleaning or equipment.

NOTE: This product is sold by weight. Settling of content during storage and handling will occur.
