AQUA CHEM SUPER CHLORINATING CARTRIDGE, TYPE "E", provides a very simple method of sanitizing your pool by dissolving controlled amount of dry chlorinating product automatically over several weeks time, to supply the required residual chlorine.

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

AQUA CHEM SUPER CHLORINATING CARTRIDGE, TYPE "E", is a floating chlorinator and/or replacement cartridge for mechanical feeder.

1. STABILIZE the pool with AQUA CHEM STABILIZER/CONDITIONER (Cyanuric Acid)*. Omit if this has been done previously.
2. MEASURE pH immediately and at least once a week with an AQUA CHEM TEST KIT*. Adjust pH to 7.2-7.8, if necessary, by adding AQUA CHEM DRY ACID™ or LIQUID ACID™ to reduce pH, or by adding AQUA CHEM pH ADD™ to increase pH.
3. SUPERCHLORINATE pool water about once each 2-4 weeks. To "superchlorinate", add 10 ounces AQUA CHEM SHOCK TREAT™/10,000 gallons or 1/2 gallon AQUA CHEM TOP CLOR® II Swimming Pool Chlorinating Liquid™/10,000 gallons. Resume regular program when residual chlorine falls to 1.0-1.5 PPM.
4. MEASURE RESIDUAL CHLORINE. Do not enter pool until residual chlorine has dropped to 1.5 PPM.

HOW TO ACTIVATE YOUR CARTRIDGE FOR CONVENIENT CONTINUOUS POOL CHLORINATION

1. PUNCH HOLE in dimple of corresponding gallonage.

HOLE NO.	GALLONAGE	HOLE NO.	GALLONAGE
1	10,000	4	40,000
2	20,000	5	50,000
3	30,000	6	60,000

Over 60,000 gallons, add a second cartridge.

2. PUNCH HOLES in all dimples below the one you punched in Step 1.
3. CHECK RESIDUAL CHLORINE with an AQUA CHEM TEST KIT*. Maintain reading of 1.0-1.5 during the swimming season.
4. IF INSUFFICIENT CHLORINE is being dispensed, punch more holes or add additional cartridges. If too much chlorine is being dispensed, close off some holes.

NOTE: AQUA CHEM SUPER CHLORINATING CARTRIDGE, TYPE "E", contains built-in conditioner (Cyanuric Acid). If it is used regularly, no further addition of AQUA CHEM STABILIZER/CONDITIONER* will be required.

*Follow directions for use on labels of these AQUA CHEM products.

Our recommendations for use of this product are based on tests believed to be reliable. The use of this product being beyond the control of the manufacturer, no guarantee, expressed or implied, is made as to the effects of such or the results obtained, if not used in accordance with the directions or established safe practice. The buyer must assume all responsibility, including injury or damage, resulting from its misuse as such, or in combination with other materials.

HOW TO CALCULATE POOL CAPACITY

Shape of pool	Gallons of water (Dimensions in feet)
Rectangular	Average depth x average length x average width x 7.5
Circular	Diameter x diameter x average depth x 5.9
Oval with straight sides	Full width x full length x average depth x 6.7
Irregular	Consult pool builder

IMPORTANT NOTES

Do not completely submerge cartridge or plug vent holes, as gas build-up may cause a violent explosion. Do not refill or attempt to open this cartridge. The buyer must assume all responsibilities, including injury or damage, resulting from its misuse as such, or in combination with other materials.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

PHYSICAL AND CHEMICAL HAZARDS - STRONG OXIDIZING AGENT: Mix only with water. Use clean dry utensils. Do not completely submerge cartridge or plug vent holes, as gas build-up may cause violent explosion. Do not refill, or attempt to open this cartridge. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with NPDES Permit. For guidance contact the regional office of EPA.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area, or bury in a safe place.
