**PRODUCT DESCRIPTION:** Aqua Chem Stabilized Chlorine is an easy and economical way to maintain the chlorine residual from your pool. Aqua Chem Stabilizer helps reduce chlorine evaporation, sunlight and other factors. When used as directed, the cartridge automatically releases the correct amount of chlorine in a constant flow. This reduces the harmful effects of chlorine on your pool for several weeks. It used regularly, no additional shock treatments are needed. May be used as a refill for automatic chlorinating systems using the Type 15™ refill cartridge.

**IMPORTANT NOTES**

- Do not completely submerge cartridge or allow vent holes to become clogged. Chlorine gas may build up and cause a violent explosion. Do not attempt to open or refill the cartridge.
- Superchlorination to eliminate harmful algae and micro-organisms should be done every 2-4 weeks or at least each time a chlorinating cartridge is removed. For this purpose, use Aqua Chem Shock Treatment or Liquid Chlorinator following label directions. During superchlorination, remove chlorinating cartridge from pool. Place it back in pool when the process is completed.

**DIRECTIONS FOR USE**

It is a violation of federal law to use this product in any manner inconsistent with its labeling **BEFORE YOU BEGIN:**

- Make sure all pool equipment is working properly, including pump, filter, skimmer and heater.
- For use in automatic chlorinating systems, follow equipment manufacturer's directions for installation of the Type 15™ cartridge.
- For use as a floating chlorinator, start by making sure water has been treated with a stabilizer to retard chlorine loss. For water with unstabilized chlorine, add Aqua Chem Stabilizer once following label directions.
- Check residual chlorine level with an Aqua Chem Test Kit. Desirable range is 1.0 - 1.5 parts per million of water (ppm). If necessary, add Aqua Chem Stabilized Granules or Aqua Chem Liquid Chlorinator accordingly. To determine the water's total hardness level, use the Hardness Cartridge for this purpose. Use rapidly replace containers. Use for maintenance of chlorine levels only.
- Also check water pH (acidity/alkalinity balance) with an Aqua Chem Test Kit. Water pH should be 7.2 - 7.6. If not, adjust by adding Aqua Chem pH Decreaser to lower pH, or Aqua Chem pH Add to raise pH. Be sure to follow product directions.

**HOW USE AQUA CHEM STABILIZED CARTRIDGE**

- Punch out numbered hole in cartridge corresponding to pool size as indicated below. Use a large nail, sharp knife or similar tool for this purpose. Place cartridge on a solid surface and work carefully to avoid injury.  

Pool Capacity in Gallons	Open Hole Number
10,000	1
20,000	2
30,000	3
40,000	4
50,000	5
60,000	6
- For pools of intermediate size, refer to next larger capacity. (Example: for 25,000 gallon pool, open hole number 3). For pools larger than 60,000 gallons, use 2 or more cartridges and double the number of holes in comparison to chart. For example, for 40,000 gallon pool, use 2 cartridges and open hole #4.
- Place cartridge in chlorinator in center of the pool and wait for 24 hours. Then, check chlorine level with Aqua Chem Test Kit. Correct chlorine level to 1.0 ppm. If chlorine level is above 1.5 ppm, wait 24 hours and recheck. To maintain pool and residual level is below 1.0 ppm.

## BEST AVAILABLE COPY

If you are unsure of the pool capacity, use the following chart to calculate volume.

**HOW TO CALCULATE POOL CAPACITY**

Shape of pool	Formula
Rectangular	Average depth x average length x average width x 7.5
Circular	Diameter x diameter x average depth x 5.9
Irregular	Full width x full length x average depth x 6.7

**PRECAUTIONARY STATEMENT: HAZARDS TO HUMAN AND DOMESTIC ANIMALS**

**DANGER:** Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or in clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before use. **STATEMENT OF PRACTICAL TREATMENT (FIRST AID):** IF SWALLOWED: Drink large quantities of water. Do not induce vomiting. Never give liquids to any unconscious person. Call a physician immediately. **IF ON SKIN:** Brush off excess chemical and flush skin with water for at least 15 minutes. If irritation persists, get medical attention. **IF IN EYES:** Flush with cold water for at least 15 minutes. Get medical attention. **NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage.

IN THE EVENT OF A MEDICAL EMERGENCY CALL COLLECT 1-800-623-5766

**ENVIRONMENTAL HAZARDS:** This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance, contact the regional office of EPA.

**PHYSICAL AND CHEMICAL HAZARDS-STRONG OXIDIZING AGENT:** Mix this product with water only. Use only clean, dry utensils. Do not completely submerge cartridge or allow holes to become clogged. If water occurs, chlorine gas may become trapped and cause a violent explosion. Do not attempt to open or refill this cartridge. Contamination of cartridge contents with moisture, organic matter or other chemicals may start a chemical reaction, generating heat, creating hazardous gases, and possibly causing fire or explosion. If cartridge becomes contaminated or product becomes decomposed, do not reuse. Seal the container outdoors. Flood cartridge with large volumes of water and keep animals and humans away from water. **Flow rate:**

**STORAGE AND DISPOSAL:** Keep this product in tightly closed original container, when not in use. Store in a locked, cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage, or disposal, or cleaning of equipment. If you have any questions or comments about Aqua Chem Products or their use, please call or toll free. In the continental U.S. Call 1-800-252-7000. Ask for your local distributor.
