

DISPOSABLE FOR USE

Use of this product in any manner inconsistent with its labeling is a violation of Federal Law.

PRODUCT DESCRIPTION: Aqua Chem™ Spa Shock Treatment is formulated expressly for the purpose of reducing harmful growth of all types of algae and other microorganisms in spas and hot tubs. Shock treatment, or "superchlorination," is important as a part of a regular maintenance program for water cleanliness and preservation of spa or hot tub. This product will raise residual chlorine level, but is not intended as a substitute for routine chlorination chemicals.

IMPORTANT NOTES

1. Aqua Chem Spa Shock Treatment should not be used more than one time per day. If bathtubs use spa or hot tub, water should be drained and refilled every 30 days.
2. Avoid introducing soap, lotions or oils into water. Do not soil tub or bathtubs with water. Avoid overloading spa with bathers.
3. Wear rubber gloves and face shield or goggles when handling this product. Avoid breathing dust from product. Remove and clean contaminated clothing before reuse.

HOW TO USE AQUA CHEM SPA SHOCK TREATMENT

1. Before using any water treatment chemicals, check to ensure that all spa or hot tub equipment is working properly, including pumps, filter, thermostat and heater.
2. Check water pH (acidity/alkalinity) balance using an Aqua Chem test kit at least once weekly and before adding Aqua Chem Spa Shock Treatment. The correct pH range is 7.4-7.6. Adjust as needed by adding Aqua Chem Spa pH Decreaser to lower pH, or Aqua Chem Spa pH Increaser to raise pH. Follow label directions and repeat after treatment to ensure accurate pH adjustment.
3. For maximum effectiveness, residual chlorine level should be at least 1.0 parts of chlorine per million part of water (ppm) before Aqua Chem Spa Shock Treatment is added to water. Adjust residual chlorine to normal 1.0-2.0 ppm level by adding Aqua Chem Spa Stabilized Chlorinating Granules, following label directions.
4. Turn off heater and pump. Add Aqua Chem Spa Shock Treatment granules at a rate of 1 ounce per 250 gallons of water by pouring granules directly into water. Wait 10-15 minutes to allow granules to dissolve completely and disperse in water. Turn pump on and operate it for at least 1 hour to distribute Aqua Chem Spa Shock Treatment evenly.

NOTE: Residual chlorine level and growth rate of algae and microorganisms are affected by bathers, load, water temperature and sunlight exposure. Always adjust chemical treatment schedule according to your circumstances.

PRECAUTIONARY STATEMENTS: HAZARDOUS TO HUMANS AND DOMESTIC ANIMALS

HAZARDOUS: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles, face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit for its discharge. Contact the regional office of the EPA.

PHYSICAL AND CHEMICAL HAZARD/SIGNAL WORDS: **IRRITANT.** Mix only with water. Use clean, dry utensils. Do not add this product to any suspension device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Combination with reactive, organic matter or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reuse container. If possible, isolate container in open or well-ventilated area. Flood with large volumes of water, if necessary.

STORAGE AND DISPOSAL: Keep this product in tightly closed original container when not in use. Store in a cooled, cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissipate all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not continuously load or load by storage or disposal, or cleaning of equipment.

NOTE: This product is sold by weight. Settling of contents during storage and handling will occur.
