FOR PER NOTICE 84-8

PRODUCT DESCRIPTION: Aqua Chem® Shock Treatment for Spas is a fast dissolving granular product used for periodic superchlorinating to eliminate most of the algae and micro organisms found in a spa or hot tub. It helps prevent unsightly water conditions and damage to spa surfaces and equipment which result from algae growth. This product will raise residual chlorine levels but is not intended for use as a routine chlorinator.

IMPORTANT NOTES

1. When using other Aqua Chem products, always follow label directions for those products.
2. These directions are for shock treatment under normal conditions. Sunlight, water temperature, the number of bathers, and the frequency and duration of spa use all affect the rate at which unsightly water conditions develop. Adjust the frequency of Shock Treatment applications accordingly.
3. Aqua Chem Shock Treatment for Spas should not be used more than once a day. If spa receives daily use, drain and refill with water every 30 days.
4. Wear rubber gloves and face shield or goggles when handling this product. Avoid breathing dust from product. Remove and clean contaminated clothing before reuse.

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in any manner inconsistent with its labeling.

BEFORE YOU BEGIN:

1. Make sure all spa equipment is working properly, including pump, filter, summer and heater. Backwash filter following manufacturer's directions.
2. Check water pH (acidic/alkaline) balance using an Aqua Chem Test Kit following label directions. Desirable pH range is 7.2-7.8. If necessary, adjust pH by adding Aqua Chem pH Decreaser to lower pH or by adding Aqua Chem pH Raiser to raise pH. Be sure to follow label directions.
3. Check residual chlorine level with an Aqua Chem Test Kit. For maximum effectiveness, chlorine level should be at least 1.0 parts per million (ppm) before Aqua Chem Shock Treatment is added to water. If necessary, add Aqua Chem Stabilized Granules for Spas following label directions until residual chlorine registers 1.0-2.0 ppm as measured by a test kit.

HOW TO USE AQUA CHEM SHOCK TREATMENT:

1. Make sure recirculating pump and heater are not operating. Then add Shock Treatment granules at a rate of 1 ounce (2 Tbsp) per 250 gallons of water by filtering granules into water.
2. Wait 10-15 minutes for granules to dissolve and disperse in water. Operate recirculating pump for at least 1 hour to ensure even distribution of chemical in water.
3. Do not allow bathers to use spa until chlorine level is below 3.0 ppm measured by a test kit.
4. Use this product every 2 weeks or per your spa's maintenance program or more frequently if heavy bather use.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CORROSIVE. Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

STATEMENT OF PRACTICAL TREATMENT (FIRST AID)

IF SWALLOWED: Food (not bread) should be eaten followed by glass of or cooling of. Call physician immediately if 60 SEEM. Brush off excess dry chemical. Flush skin with cold water for at least 15 minutes. If irritation persists, obtain medical attention. **IF IN EYES:** Flush with cold water for at least 15 minutes. Obtain medical attention.

**IN THE EVENT OF A MEDICAL EMERGENCY
CALL COLLECT 1-800-823-8716**

ENVIRONMENTAL HAZARD: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waterways in accordance with an NPDES Permit. For guidance, contact the regional office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS/STONG OXIDIZING AGENT Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion in case of combustion or decomposition. Do not reuse container. If possible, release container in open air or well-ventilated area. Flood with large volumes of water if necessary.

STORAGE AND DISPOSAL: Keep this product in tightly closed original container when not in use. Store in a cooled, cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, release container (if possible) and flood area with large amounts of water to remove all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage or disposal or cleaning of equipment.

NOTE: This product is sold by weight. Sealing of containers during storage and handling will occur. If you have any questions or comments about Aqua Chem Products or their use, please call us toll free. In the continental U.S. call 1-800-352-7000.

PRODUCT DESCRIPTION: Aqua Chem Shock Treatment for Spas is a fast-dissolving granular product used for periodic superchlorinating to eliminate most of the algae and protozoans found in a spa or hot tub. It helps prevent unsanitary water conditions and sanitize spa surfaces and equipment which result from algae growth. This product will raise residual chlorine levels but is not intended for use as a routine chlorinator.

IMPORTANT NOTES

1. When using other Aqua Chem products, as outlined in directions for Aqua Chem Shock Treatment, always follow label directions for those products.
2. These directions are for shock treatment under normal conditions. Sunlight, water temperature, the number of bathers, and the frequency and duration of spa use all affect the rate at which unsanitary water conditions develop. Adjust the frequency of Shock Treatment applications accordingly.
3. Aqua Chem Shock Treatment for Spas should not be used more than once a day. If spa receives daily use, drain and refill with water every 30 days.
4. Wear rubber gloves and face shield or goggles when handling this product. Avoid breathing dust from product. Keep out of clean contaminated clothing before use.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in any manner not consistent with its labeling.

BEFORE YOU BEGIN

1. Make sure all spa equipment is working properly, including pump, filter, saunas and heater. Backwash filter following manufacturer's directions.
2. Check water pH. acidity should be between 7.2-7.6. If necessary, adjust pH by adding Aqua Chem pH Buffer Raiser to lower pH or by adding Aqua Chem pH Add to raise pH. Be sure to follow label directions.
3. Check residual chlorine level with an Aqua Chem Test Kit. For maximum effectiveness, chlorine level should be at least 1.0 parts per million (ppm) before Aqua Chem Shock Treatment is added to water. If necessary, add Aqua Chem Shocked Granules for Spas following label directions until residual chlorine registers 1.0-2.0 ppm as measured by a test kit.

NOW USE AQUA CHEM SHOCK TREATMENT

1. Make sure recirculating pump and aerator are not operating. Then add Shock Treatment granules at a rate of 1 ounce (2 Tbsp.) per 250 gallons of water by pouring granules into water.
2. Wait 10-15 minutes for granules to dissolve and disperse in water.
3. Operate recirculating pump for at least 1 hour to ensure even distribution of chemical in water.
4. Do not allow bathers to use spa until residual chlorine level is below 1.0 ppm as measured by test kit.
5. Use this product every 2-4 weeks as part of your routine maintenance program to keep the water clean and clear.
