AQUA CHEM

BALANCED FOR CLEAN

Shock Treatment

FOR SUPERCHLORINATION

ACTIVE INGREDIENT: "Lithium Hypochlorite
INERT INGREDIENTS:
*Available Chlorine 35%

KEEP OUT OF REACH OF CHILDREN
DANGER Highly corrosive. Read
precautions and first aid on back panel

NET WT 16 OZ (1 LB)

**SHOCK TREATMENT
FOR SPAS**

PRODUCT DESCRIPTION: Aqua Chem Shock Treatment for Spas is a fast dissolving granular product used for periodic superchlorinating to eliminate most of the algae and other organisms found in a spa or hot tub. It helps prevent unsightly algae conditions and damage to spa surfaces and equipment which result from algae growth. This product will raise residual chlorine levels but is not intended for use as a routine chlorinator.

IMPORTANT NOTES

1. When using other Aqua Chem products, as outlined in directions for Aqua Chem Shock Treatment, always follow label directions for those products.
2. These directions are for shock treatment under normal conditions. Sunlight, water temperature, the number of bathers, and the frequency and duration of spa use all affect the rate at which unsightly water conditions develop. Adjust the frequency of Shock Treatment applications accordingly.
3. Aqua Chem Shock Treatment for Spas should not be used more than once a day. If spa receives daily use, drain and refill with water every 30 days.
4. Wear rubber gloves and face shield or goggles when handling this product. Avoid breathing dust from product. Wetland and clean contaminated clothing before reuse.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in any manner inconsistent with the following:

BEFORE YOU BEGIN

1. Make sure all spa equipment is working properly, including pump, filter, skimmer and heater. Backwash filter following manufacturer's directions.
2. Check water pH carefully and adjust before using an Aqua Chem Test Kit following label directions. Desirable pH range is 7.4-7.6. If necessary, adjust pH by adding Aqua Chem pH Decreaser to raise pH or by adding Aqua Chem pH Raiser to raise pH. Be sure to follow label directions.
3. Check residual chlorine level with an Aqua Chem Test Kit. For maximum effectiveness, chlorine level should be at least 1.0 parts per million (ppm) before Aqua Chem Shock Treatment is added to water. If necessary, add Aqua Chem Stabilized Chlorine for Spas following label directions until residual chlorine registers 1.0-2.0 ppm as measured by a test kit.

HOW USE AQUA CHEM SHOCK TREATMENT

1. Make sure filter is clean and pump and heater are still operating. Then add Shock Treatment granules at a rate of 1 pound per 2,000 gallons of water by pouring granules into water.
2. Wait 10-15 minutes for granules to dissolve in 2 inches of water.
3. Operate filter and pump for at least 1 hour to circulate and distribute granules in water.
4. Do not allow bathers to use spa until residual chlorine level is below 3.0 ppm measured by a test kit.
5. Use this product every 2 weeks as part of your routine superchlorination program or more frequently following heavy spa use.

PRECAUTIONARY STATEMENTS - HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER Highly Corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or in clothing. Wear goggles or face shield and rubber gloves when handling. Breathing to nose and mouth. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

STATEMENT OF PRACTICAL TREATMENT (FIRST AID)

IF SWALLOWED: Feed action bread soaked in milk. Followed by olive oil or cooking oil. Call physician immediately. **IF ON SKIN:** Brush off excess dry chemical. Flush skin with cold water for at least 15 minutes. If irritation persists, obtain medical attention. **IF IN EYES:** Flush with cold water for at least 15 minutes. Obtain medical attention.

IN THE EVENT OF A MEDICAL EMERGENCY
CALL COLLECT 1 800 823 5746

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds or public waters unless in a clear space with an NPDES Permit. For guidance, contact the regional office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS/STRONG OXIDIZING AGENT

Mix only with water. Use clean dry vessels. Do not add this product to any dispersing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of flammable gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reuse container. If possible, isolate container in open or well-ventilated area. Flood with large volumes of water if necessary.

STORAGE AND DISPOSAL: Keep this product in tightly closed original container when not in use. Store in a locked, cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container if possible, and flood area with large amounts of water to dissolve all materials before discarding the container. Do not reuse empty container but place in trash collection. Do not contaminate water, food or feed by storage or disposal or leaking of equipment.

NOTE: This product is sold by weight. Sorting of contents during shipping and handling will result in
