DIRECTIONS: Read Entire Label. Use strictly in accordance with label directions and cautions.

Regular Mixture: Use 1 Tablespoonful to 1½ gallons water; or 4 Tablespoons (2 oz.) to 6 gallons; or 8 oz. (½ pint) to 24 gallons water.

Ants: To control cut ants, red ants and other ants appearing in lawns and alleys, pour quantities of regular mixture into underground tunnels and saturate surface of colonies with regular mixture. 10 to 30 gallons for cut ants, 1 or more gallons for red ants and others.

Lawns: To control ants, chiggers, sod webworms or lawn moths, earwigs, fall armyworms, mole crickets, scorpions, ticks, fleas, saw bugs (pill bugs), wet grass thoroughly with regular mixture at rate of 1 gallon per 100 square feet. Water lawn before treatment and do not water for several days thereafter. Repeat when necessary. To control white grubs, lawn termites, and cutworms, wet grass thoroughly with regular mixture at rate of 2 gallons per 100 square feet and water lawn immediately after treatment. One application is usually sufficient.

Vegetables and Flower Garden Pests: For gardens, spray plants thoroughly with regular mixture to control pepper weevils on peppers; pea weevils on peas and beans; darkling beetles on young tomatoes; grasshoppers, flea beetles, cucumber beetles, May or June beetles — general feeders on most flowers. Spray base
