HOW TO USE

Shake well before diluting with water. Dilute 4 SEASONS Root Stimulator and Starter Solution with water at the rate of:

- 3 1/2 tablespoons per one gallon of water.
- or 1 pint in 10.5 gallons of water.

Use from 2 to 20 pints of diluted Root Stimulator and Starter Solution per plant depending on size. 1 to 2 pints on bedding plants such as pansies, mums, coleus, etc. For rose bushes and other plants about 2 or 3 pints such as boxwood, gardenia, and cycas use 4 pints per plant. 3 to 4 feet use 8 pints.

For trees use from 2 to 2 gallons or more of diluted solution per plant depending on size of tree. For diluted solution to be used on trees that are being transplanted, dilute with water immediately.

Apply to soil, if necessary, by watering with Root Stimulator and Starter Solution immediately after planting plants.

Helps Strong Root Structure Helps Produce Vigorous Plants Helps Livability of Plants Helps Fast Root Development
