ROSE DUST AND SPRAY

Serves as a handy
Garden Dust Gun

For refills, purchase the economical 2 lb. can.

TO USE:

Remove safety cap, point dust gun toward plant . . . and squeeze.

1. WHAT IS THIS PACKAGE FOR?

package of ferti-lome ROSE DUST AND SPRAY is to be for control of insects and diseases in roses, flowers and shrubs. It may be used as a dust or spray.

INSECTS CONTROLLED: Thrips, Aphids, Bagworms, Grasshoppers, Crickets, May beetles, climbing cutworms, Leaf beetles, Leaf Rollers, Lacebugs, Japanese beetles, Rose chaffer, Rose weevils, Spider mites, Red Spider, Rose Leafhopper, Rose slugs, also controls Azalea scale, Scurfy scale, Euonymus scale, Soft-brown scale, Boxwood Leaf-miners and many others.

DISEASES CONTROLLED: Black Spot, Powdery Mildew, Leaf Spot and Rust.

2. HOW DO YOU USE IT?

Dusting: Roses and other flowers—to be most effective, applications should be made before insects become numerous and before diseases are apparent. Protect plants through the growing season by dusting or spraying at 7 to 10 day intervals and after heavy rains. Cover foliage thoroughly, but do not use in excess. Pay particular attention to cover underside of leaves. For best results, apply in early morning or late evening when the temperature is low and the air is still. Do not treat during periods of excessively high temperature (about 90°F) as damage to foliage may occur. Sulfur may burn foliage when temperatures are excessively high.

Spraying: Mix 8 tablespoonsful in a little water to make a thin paste. Add to 1 gallon of water and agitate during application. If used in a small sprayer, shake often for agitation. Follow dusting directions for use for timing and application.

3. HERE ARE THE RESULTS YOU MAY EXPECT.

You will find that when you follow a regular scheduled insect and disease control program, your roses and flowers will not produce more blooms, but also larger and more colorful.

CAUTION: HARMFUL IF INHALED OR SWALLOWED.

Do not breathe dust. Do not take internally. Avoid breathing of dust. Skin contact may be harmful. Avoid contact. Wash hands before eating. Take shower or bath after work. Wear regular long sleeved work clothing. Change to clean clothing daily. NOTE FOR PHYSICIAN: Carbaryl is a moderate, reversible, cholinesterase inhibitor. ATROPINE IS ANTIDOTAL. For protection of honeybees, avoid unnecessary use during periods when honeybees are visiting crops. Dispose of container promptly when empty. KEEP OUT OF REACH OF CHILDREN AND ANIMALS.

This product is toxic to fish. Keep out of lakes, streams or ponds. Apply this product only as specified on this label.

NON-WARRANTY: Follow directions carefully. Timing and method of application, weather and crop conditions, mixtures with other chemicals not specifically recommended, and other influencing factors in the use of this product are beyond the control of the seller. Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.
