1. WHAT IS THIS PACKAGE FOR?

This package of ferti-lome Systemic INSECTICIDE GRANULES protects plants such as roses, chrysanthemums, azaleas, pyracantha, spirea, etc. and other flowers and shrubs from damage by Aphids, Spider Mites, Thrips, Leaf Miners, Whiteflies, Lace Bugs, Leafhoppers, and certain other pests. ferti-lome Systemic INSECTICIDE GRANULES enters a plant through its roots (systemic action) and is then moved to all parts of the plant through natural growth and sap flow. Working from inside of the plant, it controls certain sucking type insects that feed on the plant.

2. HOW DO YOU USE IT?

Apply the ready-to-use granules uniformly (see Recommended Applications) to the soil around the base of the plant. Mix the granules into the top soil, then water. The chemical, released from the granules, will reach into the root zone and be absorbed into the plant. The granules can also be scattered over planting beds and mixed into the top soil before sowing seed or setting bulbs or transplants. Additional applications of ferti-lome Systemic INSECTICIDE GRANULES can be made as needed to maintain insect control after the plants start to grow.

Back Panel Continued

RECOMMENDED APPLICATIONS:

<p><u>For Flowers</u> Agave Calla lily Chrysanthemum Coreopsis Daffodil Gladiolus Hibiscus Iris Marigold Petunia Rose Tulip Zinnia</p>	<p><u>To Control</u> Aphids (Plant Lice) Lace Bugs Leafhoppers Spider mites Thrips Whiteflies</p>	<p><u>Amount to Use</u> <u>Before Planting:</u> Apply 15 ounces evenly over 200 square feet (10 x 20 ft.) of bed area and work into the top 2 to 3 inches of soil. Sow seed or set plants and water thoroughly.</p> <p><u>Growing Plants:</u> <u>For Individual Plants:</u> Apply one rounded teaspoonful around base of plant, work into soil and water thoroughly.</p> <p><u>For Flowers in a Row:</u> Apply one rounded teaspoonful per foot of row in a narrow band near base of plants, work into top soil and water thoroughly. Repeat application at 4 to 6 week intervals if insects reappear.</p> <p><u>For Seed Plants:</u> Apply one rounded teaspoonful per foot of row. Mix thoroughly and broadcast evenly with soil.</p>
<p><u>Strips</u> Aster Begonia Camellia Chrysanthemum Coreopsis Daffodil Gladiolus Hibiscus Iris Marigold Petunia Rose Tulip Zinnia</p>	<p>Aphids (Plant Lice) Lace Bugs Leafhoppers Spider mites Thrips Whiteflies</p>	<p>Apply 2 to 4 rounded teaspoonfuls per foot of row height. Broadcast at same rate for strips or work in the higher rate for blocks. Apply in height. Distribute the required amount evenly from the top of plants to the soil surface on all sides of the plants. Work into the top 2 to 3 inches of soil and water thoroughly. Repeat application at 4 to 6 week intervals if required.</p>
<p><u>Tomatoes</u></p>	<p>Aphids Flea beetles Leafhoppers Leaf miners Mites</p>	<p><u>In The Seed Sowing:</u> Apply one rounded teaspoonful per foot of row. Place the granules either below or to one side of the seed. Do not allow seed to come into direct contact with the granules.</p> <p><u>In The Transplant Hole:</u> Apply one rounded teaspoonful per plant in the transplant hole. Mix granules with soil in hole prior to setting plant.</p>
