

RETREATMENT RESTRICTIONS

1. Retreatment for subterranean termites should only be made when there is evidence of re-infestation subsequent to the initial treatment or there has been a disruption of the chemical barrier in the soil due to construction, excavations, landscaping, etc.
2. Retreatments may be made to critical areas in accordance with the application techniques described above. This application should be made as a spot treatment to these areas.

Routine retreatment of the entire premises should be avoided.

3. HERE ARE THE RESULTS YOU MAY EXPECT:

This product, used according to directions, will kill established termites and lay down a chemical barrier to prevent new infestations. However, it is essential that you inspect the treated area annually and retreat if necessary.

DISPOSAL

Do not reuse empty container. Wrap container and put in trash collection.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. May be absorbed through the skin. Do not breathe spray mist. Avoid contact with skin, eyes or clothing. Wash thoroughly after handling and before eating or smoking. Avoid contamination of feed and foodstuffs. For utensils such as teaspoons or measuring cups should not be used for food purposes after use with pesticides.

PHYSICAL OR CHEMICAL HAZARDS

DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME.

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Call a physician or Poison Control Center immediately. Gastric lavage is indicated if material was taken internally. DO NOT INDUCE VOMITING. Vomiting may cause aspiration pneumonia.

IF INHALED: Remove victim to fresh air. Apply artificial respiration if indicated.

IF ON SKIN: Remove contaminated clothing and wash affected areas with soap and water.

IF IN EYES: Flush eyes with plenty of water. Get medical attention immediately.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and other wildlife. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of a spray. Apply this product only as specified on this label.

Buyer assumes all risks of use, storage or handling of this material without strict accordance with directions given herein.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

1. WHAT IS THIS PACKAGE FOR?

This product is specifically formulated for the do-it-yourselfer. Kills home termite colonies and economic.

2. HOW DO YOU USE IT?

Use Ferti-Termite Termite Spray in a 1% water emulsion as follows. Prepare by mixing 4 1/2 tablespoons in 1 gallon of water. Use proportionally larger amounts for larger jobs.

SUBTERRANEAN TERMITES - DIRECTIONS FOR HOMEOWNER USE

TERMITE CONTROL IN EXISTING STRUCTURES

BUILDINGS WITH BASEMENTS OR CRAWL SPACES

First remove all loose debris and wood forms. Around pipes, pipes, chimney bases and along foundations of poured concrete dig a trench 6 inches wide and 4 inches deep. For brick and block foundation dig the trench about 12 inches deep. If footing is more than 12 inches deep, make holes with a crowbar, pipe or a rod about one foot apart that extend from the trench bottom to the top of the footing. Make holes closer in hard packed clay soil. NEVER DIG BELOW THE TOP OF THE FOOTING. Apply the emulsion or solution in the trench at a rate of 3 gallons per 10 linear feet per foot of depth. Apply half of this to the back fill. Likewise, treat along the inside of foundations of crawl space buildings. Cover treated soil with a thin layer of untreated soil.

For raised porches, terraces and entrance slabs, drill holes at one foot intervals, 6 inches from the foundation, and pour one half gallon of emulsion or solution into each hole. Refill holes. Slabs with heat ducts or radiating heat pipes should be treated by commercial pest control operator.

The object is to establish a treated soil barrier which will prevent termite entry. Other critical areas may also require treatment, particularly if there are inaccessible areas, basements or slab type construction. It is suggested that you contact the Agricultural Cooperative Extension Service for advice or consult a Commercial Pest Control Service.

Avoid contamination of public and private water supplies by following these precautions. Do not allow a hose or any type of faucet extension to reach into the termite emulsion or solution while filling or mixing this material with water. Use anti-backflow or anti-siphonage equipment on all filling equipment. These devices can be purchased at hardware or plumbing supply stores. Use of a T-bar flow equipment will help to insure that the user of this toxic chemical will not contaminate domestic water supplies. Refer to Federal, Federal Housing Administration, state and local specifications for safe distances of treatment areas from wells. Soils in the vicinity of wells, cisterns or ponds should not be treated if it is water saturated, subject to excessive saturation due to an accumulation of water or if the soil to be treated around the perimeter of the structure is at a grade lower than surrounding yard or property area. If this is the situation treat as follows: Do Not Apply Under Pressure. Soil should be removed to an area safe from water or dust, water contamination, treated area to stand undisturbed for two to four hours then returned to the trench which has been lined with 4 mil plastic sheeting. Be careful not to puncture the plastic sheeting when returning soil to the trench. Do not treat structures that contain cisterns or wells.

ferti-termite

Termite

- Kills Established Termites and Prevents New Infestations During Swarm and Subterranean Migration.
- Gives Long Residual Control.
- Ideal For Home "Do-it-Yourself"
- 4 1/2 Tablespoons Make 1 Gallon
- 1 Gallon of This Concentrate Makes 56 Gallons Spray.

ACTIVE INGREDIENTS:
Technical Chlordane*
Aromatic Petroleum Derivatives
INERT INGREDIENTS:
*Equivalent to 30, Octachloro 4,7-methanotetrahydroin- related compounds.

INSTRUCTIONS
 For subterranean termites should only be made when there is an infestation subsequent to the initial treatment, or there has been a breach of the chemical barrier in the soil due to construction excavations, etc.
 It may be made to critical areas in accordance with the application instructions listed above. This application should be made as a spot treatment in areas.
 None of the entire premises should be avoided.

RESULTS YOU MAY EXPECT:
 According to directions, will kill established termites and lay down a barrier to prevent new infestations. However, it is essential that you re-treat annually and retreat if necessary.

DISPOSAL
 In a container. Wrap container and put in trash collection.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
 Irritant. May be absorbed through the skin. Do not breathe dust or contact with skin, eyes or clothing. Wash thoroughly after handling. Avoid contamination of feed and foodstuffs. Food spoons or measuring cups should not be used for food purposes.

PHYSICAL OR CHEMICAL HAZARDS
 IR. SPILL OR STORE NEAR HEAT OR OPEN FLAME

STATEMENT OF PRACTICAL TREATMENT
 Call a physician or Poison Control Center immediately. Gastric lavage should be taken internally. DO NOT INDUCE VOMITING. Vomiting can cause pneumonia.
 Move victim to fresh air. Apply artificial respiration if indicated. Remove contaminated clothing and wash affected areas with soap and water.
 Wash with plenty of water. Get medical attention immediately.

ENVIRONMENTAL HAZARDS
 Do not apply directly to water bodies, streams, ponds, rivers or creeks, or to irrigation systems, or to other areas in which the material may be applied. Do not apply to fish, birds, or other wildlife. Do not apply directly to water bodies by means of aircraft or equipment or ships or barges. Apply this product on the label.
 Avoid use, storage, or handling of this material near or in areas where it may be applied.
