1. WHAT IS THIS PACKAGE FOR?

ferti-lome CITRUS & ORNAMENTAL SPRAY was developed to control mites and scale crawlers on your citrus, ornamentals and shade trees as specified below.

2. HOW DO YOU USE IT?

DIRECTIONS: Unless otherwise specified begin applications when scale "crawlers" or mites first appear. Thorough coverage of foliage and branches is necessary for good control. Observe precautions of use on labels to assure proper mixing and compatibility when using this material with other pesticide products.

GRAPEFRUIT, LEMONS, LIMES, ORANGES, TANGELOS, TANGERINES: Against Citrus red mite, Citrus rust mite, Texas Citrus mite, Black scale, Chaff scale, Florida red scale, Clover scale, Purple scale, Snow scale, Yellow scale use 2 quarts per 100 gallons of water. (1 pint per 25 gallons of water, 4 teaspoons per gallon of water). Do not apply more than 2,000 gallons of spray per acre. Apply when insects first appear and repeat as required. When snow scale is a problem, it is important that trunks, limbs and twigs are thoroughly sprayed. On grapefruit, oranges and tangerines do not apply within 90 days of preceding treatment. May be applied up to day of harvest. On tangerines do not apply within 90 days of preceding treatment. Do not apply more than twice per season. May be applied up to day of harvest. On lemons and limes do not apply more than once per season. Do not apply within 21 days of harvest.

AZALEAS, CAMELIAS, GARDENIAS, LIGUSTRUM, PITTOSPORUM, SASANGUA, VIBURNUM, BOXWOOD: Against Camellia scale, Tea scale (Camellia), Euonymus scale, Florida red scale, Florida wax scale, and Spider mites, use 2-3 quarts per 100 gallons of water. (1-1 1/2 pints per 25 gallons of water, 4-6 teaspoons per gallon of water). Begin application when scale "crawlers" or mites first appear. Cover upper and lower surfaces of all leaves and branches thoroughly. **CAUTION:** Do not apply to American red bud as injury may occur.

PINE: Against Pine Needle Scale use 2-3 quarts per 100 gallons of water. (1-1 1/2 pints per 25 gallons of water, 4-6 teaspoons per gallon of water). Treat when overwintering eggs have started to hatch. For summer control, apply when "crawlers" first appear.

JUNIPER, YEW (TAXUS): Against Two Spotted Mites use 1-2 quarts per 100 gallons of water. (1/2-1 pint per 25 gallons of water, 2-4 teaspoons per gallon of water).

Repeat as required to maintain control. Slight needle drop has

occurred on some varieties of Taxus following application of this material. **USAGE CAUTION:** USE OF THIS MATERIAL IN A MANNER OR AT A TIME OTHER THAN IN ACCORDANCE WITH THE DIRECTIONS MAY PRODUCE PLANT INJURY, EXCESS RESIDUE OR OTHER UNDESIRABLE RESULTS. Avoid application of all sprays to plants suffering from a lack of moisture.

3. HERE ARE THE RESULTS YOU MAY EXPECT!

This new product, when used according to directions, will give quick and lasting control of mites and scale insects in your home gardens.

WARNING: Harmful if swallowed. May be absorbed through skin. Do not breathe vapor or spray mist. Avoid contact with skin, eyes and clothing. Wash thoroughly after handling. Avoid storage near food and feed products. Ethion is a cholinesterase inhibitor. Atropine is antidotal.

This product is toxic to fish and wildlife. Birds feeding on treated area may be killed. Do not contaminate water by cleaning of equipment, or disposal of wastes.
