DIRECTIONS FOR USE

GENERAL WEED AND GRASS CONTROL: POLY BOND COTON WEEDEK + SURFACANT is found effective for controlling Johnson grass, goose grass, water grass, Cocklebur, nutgrass, and Green and Yellow Foxtail along drainage ditchbanks, right-of-ways, implement storage yards and similar non-crow areas where cultivation is not practical.

RECOMMENDED RATES FOR GENERAL WEED CONTROL: To treat one acre mix 4 pints of POLY BOND COTON WEEDEK + SURFACANT with 10-20 gallons of water. Apply as a spray, thoroughly wetting foliage and stems of weeds to be killed. Spot treatments to control re-growth may be necessary.

NON-WARRANTY: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.

CAUTION: Harmful if swallowed. Avoid contact with skin. Wash hands after using. Avoid breathing spray mist. Avoid contamination of feed and food-stuffs. Keep children and animals off of treated areas until washed into soil.

Do not contaminate water used by wildlife or aquatic life or water used for domestic or irrigation purposes.

ANTIDOTE: If taken internally, induce vomiting and call a physician at once.
