ACTIVE INGREDIENTS:

ARSENIC ACID..... 75.00%

INERT INGREDIENTS..... 25.00%

TOTAL..... 100.00%

TOTAL ARSENIC (WATER SOLUBLE) EXPRESSED AS METALLIC ARSENIC..... 39.61

ARSENIC TRIOXIDE EQUIVALENT..... 52.30

**HI-YIELD CHEMICAL COMPANY
BONHAM, TEXAS**

"STRIPEZE"

NET CONTENTS ONE GALLON

Handwritten scribbles

DIRECTIONS:

SINERGIZED H-10^e is a cotton desiccant. It kills cotton leaves rapidly so that mechanical cotton harvesters can gather the cotton without interference from green, sappy leaves. SINERGIZED H-10^e is recommended as a primary treatment only for cotton that is to be stripped mechanically, and not as a primary treatment for cotton that is to be harvested by spindle-type pickers. SINERGIZED H-10^e may be applied after application of a true defoliant as a "clean-up" to cotton to kill second growth leaves prior to picking with either spindle-type pickers or strippers.

SINERGIZED H-10^e is a very poisonous material and should not be applied under any circumstances to cotton that will be harvested by humans.

Mix 1 to 1½ quarts SINERGIZED H-10^e with sufficient water to make 5 gallons of spray and apply to each acre of cotton. For best results, thorough uniform coverage is necessary. Apply as a coarse spray at low pressure and when the air is calm so as to avoid spray drift. Best results will be obtained from applications made when the weather is clear and hot. Do not make any applications until the cotton is mature and all bolls expected to produce lint are fully opened. Applications made prior to this time may kill immature plants and bolls and greatly reduce yields.

CAUTION

SINERGIZED H-10^e has acidic properties and reacts with fabric, galvanized metals, black iron, and certain other metals. Any metallic equipment or nozzles used in application of SINERGIZED H-10^e should be made of stainless steel, as there is little or no reaction with this metal at field strength dilution. Do not use galvanized metal containers or spraying equipment as highly toxic arsine gas may be formed. To reduce possible corrosion to metals and deterioration of fabric and other parts, all equipment including airplanes which have been in contact with or exposed to SINERGIZED H-10^e or its solution should be thoroughly washed with water immediately after use. SINERGIZED H-10^e should not be stored in tightly sealed, unlined metal containers because of the possibility of excessive pressure developing from hydrogen liberation.

WARNING

POISONOUS IF SWALLOWED. Avoid contact with skin, eyes and clothing. Do not breathe spray mist; wear respirator. Wash thoroughly after using and before eating or smoking. Avoid contamination of food and water to be consumed by humans and animals. Keep children off of treated areas. Avoid air drift to areas and buildings occupied by humans, animals or poultry.

Do not graze or use treated plants or gin trash for feed or forage. Keep livestock, poultry and pets off of treated areas. SINERGIZED H-10^e is injurious to all plant foliage.

Do not contaminate streams, lakes, ponds, woodlands or other non-crop areas. This product will kill fish and wildlife.

Do not apply within four days of harvest.

WASTE DISPOSAL: Rinse spray equipment and containers and dispose of liquid wastes in a pit in non-cropland located away from water supplies.

POISON

ANTIDOTE

INTERNAL: Call a physician immediately. Give a tablespoon of salt in a glass of warm water and repeat until vomit fluid is clear. Then give 2 tablespoons of Epsom Salts or Milk of Magnesia in water and plenty of milk and water. Have victim lie down and keep quiet.

EXTERNAL: In case of spillage on skin, wash promptly with soap and water.

NON-WARRANTY

Neither the manufacturer nor the seller makes any warranty concerning this product except that it conforms with the chemical description on the label. Buyer assumes all risk of using or handling whether in accordance with directions or not. Neither the manufacturer nor the seller shall be held responsible for any loss or damage to property, personnel, contamination of water or food used by animals or humans. Any buyer not accepting the above conditions shall return the unopened container to the dealer from which purchased within one week. Any buyer not returning the merchandise within this time thereby accepts the foregoing terms.

PATENT NOTICE

The use of arsenic acid as a harvest aid for cotton is protected by U.S. Patent 3,130,035. The buyer is licensed, for a royalty which has been included in the purchase price, to use the contents of this container as a cotton harvest aid according to the above patent. Royalty will be refunded if this material is not used for that purpose. Licenses at the same royalty rate to use arsenic acid obtained from any source are available directly from the patent owner, Pennsalt Chemical Corporation, Tacoma, Washington.
