DIRECTIONS FOR USE

GENERAL WEED AND GRASS CONTROL: POLY COTTON WEEDER CONCENTRATE plus 11-YIELD SPREAD has been found effective for top kill of Johnson grass, Goose grass, Water grass, Cocklebur, Nutgrass and Green and Yellow Foxtail along drainage ditchbanks, right-of-ways, implement storage yards and similar non-crop areas where cultivation is not practical.

RECOMMENDED RATES FOR GENERAL WEED CONTROL: To treat one acre, mix 2½ pints of POLY COTTON WEEDER CONCENTRATE with 28 gallons of water and 1 pint of 11-YIELD SPREAD. Apply as a spray, thoroughly wetting foliage and stems of weeds to be killed. Spot treatments to control re-growth may be necessary. (For use in Cotton, see directions in right hand panel.)

NON-WARRANTY: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.

CAUTION: Keep out of reach of children. Harmful if swallowed. Avoid contact with skin. Wash hands after using. Avoid breathing of spray mist. Avoid contamination of feed and foodstuffs. Keep away from children and domestic animals. Keep livestock off treated areas. Keep children and animals off treated areas until washed into soil.

Do not contaminate water used by wildlife or aquatic life or water used for domestic or irrigation purposes.

WASTE DISPOSAL: Rinse spray equipment and containers and dispose of liquid wastes in a pit in non-crop lands located away from water supplies.

ACTION: If taken internally, induce vomiting and call a physician at once.
