

1. WHAT IS THIS PACKAGE FOR?

Unique biological control of listed worms rather than chemical control.

2. HOW DO YOU USE IT?

Use any convenient sprayer. Unless otherwise specified, mix 2 level tablespoons of ferti-lome DIPEL BIOLOGICAL WORM SPRAY in 1 gallon of water. Spray ornamentals, shade trees, orange trees and grape vines until thorough leaf coverage is achieved. For listed vegetables, apply to 500 sq. ft. of garden area. Apply at first sign of infestation and repeat weekly when needed to maintain control. May be applied up to day of harvest on fruits and vegetables.

ORNAMENTALS & SHADE TREES: (Up to 25 ft. tall) For Spring and Fall Cankerworms (inchworms), Bagworms, Fall Webworms, Tent Caterpillar, Great Basin Tent Caterpillar (West U.S.) and Red humped Caterpillar (Calif.). For Oakmoth larvae (Calif.) use 3 level tablespoons. For Elm Spanworms use 4 level tablespoons. For Gypsy Moth, apply when caterpillars are small (2nd or 3rd instars.) Repeat if necessary.

ORANGES: For Orange dog. NOTE: For Fruit tree leaf roller use 3 level tablespoons.

GRAPES: For Grape leaf folder. For omnivorous leaf roller (Calif.) For Grape leaf folder spray as soon as possible after hatching and before larvae are protected by leaf folds.

TOMATOES: For Tomato hornworm and Cabbage looper.

BEANS, POTATOES, SPINACH, MELONS, LETTUCE, CELERY, KALE, COLLARDS, GREENS (Mustard and Turnip) and **CUCUMBERS** (South-east U.S.): For Cabbage looper. For Imported Cabbage Worm on lettuce increase dosage to 4 level tablespoons per gallon of water. **NOTE:** Caterpillars must eat a small amount of treated leaf to get lethal dose. Within a few hours after eating caterpillars stop feeding. Death follows in a few days.

3. HERE ARE THE RESULTS YOU MAY EXPECT!

Effective control of listed worms and caterpillars on ornamentals, shade trees, and vegetables with no injury to plants or beneficial insects, are obtain with this product.
