

Mole Cricket Bait

Containing DURSBAN*

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent of it's labeling.

Mole Crickets damage lawns by feeding on grass roots and by forming mole like tunnels that loosen the soil causing the grass to turn brown and die. They are found in newly planted areas and established turf as well. Feeding and tunneling occurs mostly at night.

Apply uniformly on moist soil at the rate of 1 lb. per 200 sq. ft. to home lawns and other ornamental and recreational turf grass areas using any hand or power-operated gravity or rotary type spreader designed for application of granular materials. Re-treat as necessary. Best results will occur if application is made late in the evening in June, July or August when the crickets are in the nymphal stages.

STORAGE AND DISPOSAL

Storage: Keep away from food, feedstuffs, and domestic water supplies. Keep container closed.

Disposal: Do not reuse empty container. Wrap container and put in trash collection.

STATEMENT OF PRACTICAL TREATMENT

If Swallowed—Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with fingers. Do not induce vomiting or give anything by mouth to an unconscious person. Get medical attention.

If Inhaled— Remove victim to fresh air. Apply respiration if needed.

If on skin— Wash with soap and water.

If in Eyes— Flush with water for 15 minutes. Call a physician immediately.

NOTE TO PHYSICIAN: Active ingredient is a cholinesterase inhibitor. Treat symptomatically. Atropine is an antidote. Give by injection only.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS & DOMESTIC ANIMALS CAUTION
