WINTERIZER

Moss Control

GENERAL DIRECTIONS

To take lawns through the winter season in a sturdy, disease resistant condition, use NULIFE LAWN WINTERIZER during the Fall anytime after September 1st.

STORE IN A DRY PLACE

ESTABLISHED LAWNS—Apply with spreader or evenly by hand at the rate of 40# per 5,000 square feet.

NEW LAWNS—Apply and mix well into seed bed at rate of 40# per 4,000 square feet. This will furnish vital trace elements for many seasons growth.

SHRUBS—This material is excellent for many shrubs and perennials. Apply at rate of 1# per 100 square feet of bed.

GENERAL DIRECTIONS FOR MOSS CONTROL IN LAWNS

- Step 1. Rake lawn with a steel rake, scratching up trailing moss and grass mat. Mow to 1" height.
- Step 2. Apply LAWN WINTERIZER with a fertilizer spreader using 40 lbs. per 5,000 sq. ft. of lawn area.
- Step 3. Water thoroughly. Fertilize with Nulife Deluxe Lawn Fertilizer as soon as weather permits in the Spring.

CAUTION

Do not apply in beds of rhododendrons, camellias, azaleas, and other plants which do well in acid soils.

This material may stain cement, stone or paint. Flush with water immediately after exposure.
