

NuLife WEED AND FEED

10-2-3

COVERS 5,000 SQ. FEET

GENERAL DIRECTIONS

NuLife WEED and FEED contains 2,4-D and Silvex weed killers and fertilizer to beautify your lawn.

1. Controls broad-leaved weeds such as dandelions, plantains, chickweeds, clovers and most non-grass weeds.
2. Feeds the grass and assists in producing a thicker turf of deeper color.

USE AT THE RATE OF 1 LB. TO 125 SQ. FT.

MATURE LAWNS: Apply with fertilizer spreader or by hand. If by hand, using protective gloves, measure off lawn in squares to insure even coverage. Broadcast NuLife WEED and FEED close to the surface of lawn. If using fertilizer spreader be sure it is set for proper distribution. Close spreader when stopping, backing or turning to avoid double dosage.

NEW LAWNS: Burning may result if applied to tender seedling grass less than 4 or 5 months old.

SPOT TREATMENT OF WEEDS: Apply a pinch of WEED and FEED in crown of each weed. A good time to spot treat weeds is at time of mowing lawn. Use spot treatment especially after weeds are under control.

IMPORTANT

The most satisfactory results from application of NuLife WEED and FEED are obtained if the following steps are taken (preferably in this order):

1. Mow lawn to normal height 1 to 2 days before application.
2. Water lawn thoroughly at least one day before application; this will sustain moisture until the next watering (See step 4).
3. Apply when weeds are young and actively growing and preferably in the morning when dew is on the grass. If grass is not moist at time of application, sprinkle lightly with water to hold material and prevent dust drift onto plants which might be injured by weed killers.
4. NuLife WEED and FEED should not be washed from weed leaves for 1 to 2 days after application. At this time a thorough watering should be made.

CAUTION!!

HARMFUL IF SWALLOWED. KEEP OUT OF REACH OF CHILDREN. Avoid inhalation of dust or contact with eyes, skin and clothing. Wash hands thoroughly after handling. Induce vomiting if swallowed. If material contacts the eyes, get medical attention immediately. Keep children and animals off treated areas. Do not store near fertilizers, seeds, insecticides or fungicides.

Excessive application will injure turf. When repeat treatments are necessary, allow one month between treatments. Do not use on St. Augustine grass. Carpet grass, Dichondra or clover lawns. Treatment above 80° may result in some discoloration of Bent grass. This material is injurious to many plants. It should be applied while the air is quiet to avoid drift and application on valuable plants. Vapors from this product may cause injury to susceptible plants growing in the immediate vicinity.

Environmental Note: This product is toxic to fish and wildlife. Birds feeding on treated areas may be killed. Keep out of any body of water. Do not contaminate water by cleaning equipment or disposal of wastes.

Clean fertilizer spreader several times with chemical cleaners and rinse thoroughly before using spreader for other purposes. Do not reuse this container, dispose of with refuse going to a sanitary landfill area.

NOTICE!!

Seller's guarantee shall be limited to the terms of the label, and subject thereto the buyer assumes any risk to persons or property arising out of use or handling and accepts the product on these conditions.

Turf King Weed & Feed 3-in-1

WILL NOT BURN IF USED ACCORDING TO DIRECTIONS

WEED and FEED beautifies the lawn 3 ways

1. Feeds the lawn to promote thicker, healthier turf with 24% iron sulfate
2. Helps protect from leaf grubs and cut
3. Contains Wetting Agent to increase water penetration into soil

GENERAL DIRECTIONS

APPLICATION RATE: 1/2 LBS TO 200 SQ. FT.

For Best Results:

1. Mow lawn to normal height 2 to 3 days before application
2. Water lawn thoroughly 1 day before application
3. Apply when weeds are young and actively growing and in early morning when dew is on the grass. If a heavy rain or irrigation is expected, apply material on grass and leave overnight before watering.
4. Cover equipment when stopping, backing up or turning to avoid damage from over application.
5. Do not wash material from wheel tracks for 1 to 2 days after which a thorough hosing should be done.

WEED CONTROL: To avoid damage to new turf, use on the grass at least 4 to 5 months old. Application may be made any time during the growing season when temperatures will not exceed 80°. Do not apply in rain.

GUARANTEED FERTILIZER ANALYSIS

Total Nitrogen N	16.0%
Available Phosphoric Acid P ₂ O ₅	2.0%
Soluble Potash K ₂ O	0.0%
ALSO CONTAINS	
Iron Fe	1.0%
Potential Acidity: 723 lbs. Calcium Carbonate per ton	

RECOMMENDED FERTILIZER SPREADER SETTING*

*Use only on turf grasses. Do not use on St. Augustine grass.
