

[7405-24]

SPACE SPRAY INSECTICIDE IS  
OF DUAL SYNERGIST TYPE

**DIRECTIONS**

Remove protective cap. Hold can upright with valve pointed away from face.

For flies, mosquitoes and certain other flying insects. Spray upwards into four corners of closed room for flying insects, about 15 or 20 seconds for average room. Close windows and doors for about 15 minutes after treatment.

Do not remain in treated area and do not breathe area after treatment is completed.

For roaches, ants, silverfish and certain other crawling insects. Spray liberally into cracks of woodwork, walls, floor, ceiling and brickwork and directly on insects when possible. Repeat when necessary. Cover cooking utensils, dishes and food before spraying for ants. Treat ant trails and areas where these pests enter the premises, such as door and window frames.

Do not spray on painted surfaces or other surfaces. Avoid spraying on painted surfaces. Do not spray on food and food stuff. Do not spray directly on painted surface.

**CAUTION**

Do not puncture or dispose of container in fire. Store at room temperature (not over 120 degrees F.). Do not spray on food and food stuff. Do not spray directly on painted surface.
