CHEMI - CAP WASP HORNET SPRAY
REVISED LABEL - BACK PANEL

FOR OUTDOOR USE: Can also be used in attics, warehouses and other storage areas where foods and feedstuffs are not exposed.

SHAKE WELL BEFORE USING

DIRECTIONS FOR OUTDOOR USE: Hold can upright. Using JET STREAM or FOGGER NOZZLE, point nozzle away from face and in direction of the space to be treated. (When interchanging from jet to fogger nozzle, be careful not to spray into face or eyes). With wind at back, aim at nests in trees, bushes, under eaves, chimneys, cracks or crevices, etc. Spray while moving away from treated areas. Allow spray to dissipate before occupying treated area. Thoroughly saturate nest with spray, contacting as many insects as possible. To prevent insects from falling on skin and clothes, do not stand directly under nest. Best results can be obtained if nest is sprayed in late evening when most insects are at rest. If reinfestation occurs, repeat treatment.

DIRECTIONS FOR INDOOR USE: Same as for outdoor use but do not spray in areas where food and feedstuffs are exposed or handled.
