

[7405-53]

**DIRECTIONS FOR USE**

Remove protective cap. Hold the dispenser upright point valve in desired direction. Press button to spray. Mosquitoes, Flies, Gnats. Close all doors and windows. Direct the spray to all parts of the room. Fill the room with mist, then leave the treated area. Keep room closed for at least 15-30 minutes. Ventilate the room when treatment is completed.

Worms. Application should be made in late evening when insects are at rest. Spray the area containing the food place containing any insects. Repeat as necessary.

For Crawling Insects: Roaches, Earwigs, Crickets, Millipedes, Spiders and Centipedes. Spray the areas containing places where insects live. This includes cracks, crevices, ground pipes, and sink drains. Spray under base boards and other areas. Spray directly on insects when possible.

Ants. Spray from the front of the ant trail. Spray ants where possible. Repeat as necessary.

**CAUTION:** Use in food processing plants only when plant is not in operation. Fruits should be removed or covered during treatment. All food processing surfaces should be covered or thoroughly cleaned before use. In hospitals, patients should be removed from room prior to treatment. Rooms should be ventilated for 2 hours after spraying. Do not return patient to room until after ventilation.

Avoid contamination of food and feed stuff. Cover or remove fishbowls. Remove all pet animals from area to be treated.
