EPTAM 2.3 GRANULAR FOR WEED CONTROL IN FLOWERS AND ORNAMENTALS

Read All Cautions and Directions Before Using

EPTAM can be used any time during the growing season to prevent weeds in and around flowers, trees, shrubs and ground covers.

EPTAM should be used only for recommended purposes and at recommended rates. **DO NOT OVERDOSE.**

EPTAM may cause injury to ornamentals under certain soil and climatic conditions, or if directions are not followed.

EPTAM is recommended for use on mineral soils only. Use on muck and peat soils only where previous use has proven satisfactory.

EPTAM will not kill growing weeds. Any weeds that are growing in the area to be treated should be removed before EPTAM is applied.

DIRECTIONS FOR USE

Soil to be treated should be loose and free of clods. EPTAM should be applied as uniformly as possible over the area to be treated. Use shaker canister or other granular herbicide applicator.

FOR THE CONTROL OF ANNUAL WEEDS Apply one pound to 200 square feet. After application, there should be approximately 45 particles of EPTAM per square inch of soil. Immediately (within minutes) the EPTAM granules should be thoroughly mixed into the soil using a hand rake or hand cultivator to a depth of 2-3 inches. EPTAM may also be mixed into the soil by watering immediately after application until the soil is wet to a depth of 2 inches. Additional cultivation to a depth of 1-1½ inches to promote water penetration will not destroy the effectiveness of EPTAM.

FOR THE CONTROL OF NUTGRASS, BERMUDAGRASS, AND QUACKGRASS AROUND ESTABLISHED TREES AND SHRUBS Existing stands of these perennial grasses must be pulled or hoed out before treatment. Apply EPTAM uniformly at the rate of one pound to 160 square feet (10' x 16'). Mix into the soil to a depth of 2-3 inches and water lightly for 3-5 minutes.

WHEN TO USE EPTAM

Herbaceous Plants Apply after growth is 3-5 inches high or two weeks after transplanting.

Ground Covers Apply after growth starts in spring or two weeks after transplanting.

Trees and Shrubs Apply after growth starts in spring or two weeks after transplanting.

EPTAM CAN BE USED AROUND THESE ORNAMENTALS

HERBACEOUS PLANTS

<u>Alyssum</u>	<u>Asters</u>	<u>Chrysanthemum</u>	<u>Dianthus</u>	<u>Pansy</u>	<u>Ajuga</u>	<u>Hypericum</u>	<u>Ivy</u>	<u>Periwinkle</u>	<u>Strawberry</u>
<u>Ageratum</u>	<u>Balsam</u>	<u>Dahlia</u>	<u>Marigold</u>	<u>Petunia</u>	<u>Gazania</u>	<u>Ice Plant</u>	<u>Pachysandra</u>	<u>Sedum</u>	<u>(Ornamental)</u>
<u>Amaranthus</u>	<u>Begonia</u>	<u>Daylilies</u>	<u>Nasturtium</u>	<u>Zinnia</u>					

GROUND COVERS

EVERGREEN & DECIDUOUS TREES AND SHRUBS

<u>Berberis</u>	<u>Chamaecyparis</u>	<u>Eugonymus</u>	<u>Holly (American & Japanese)</u>	<u>Leucothoe</u>	<u>Magnolia</u>	<u>Pieris</u>	<u>Podocarpus</u>	<u>Rose</u>	<u>Viburnum</u>
<u>Boxwood</u>	<u>Citrus</u>	<u>Fir</u>	<u>Juniper</u>	<u>Lilac</u>	<u>Linden</u>	<u>Oak</u>	<u>Maple</u>	<u>Pine</u>	<u>Rhododendron</u>
<u>Camellia</u>	<u>Dogwood</u>	<u>Hemlock</u>						<u>Spruce</u>	<u>Yew (Taxus)</u>

EPTAM controls over 20 species of weeds and will keep a treated area virtually weed-free for an average growing season. In semi-tropical areas, more than one application may be needed.

ANNUAL WEEDS CONTROLLED INCLUDE THE FOLLOWING

<u>Annual bluegrass</u>	<u>Chickweed (common)</u>	<u>Florida pusley</u>	<u>Goosegrass</u>	<u>Lambsquarters</u>	<u>Pigweed</u>	<u>Sandbur</u>
<u>Barnyardgrass</u>	<u>Crabgrass</u>	<u>Foxtails</u>	<u>Henbit (deadnettle)</u>	<u>Lovegrass</u>	<u>Purslane</u>	

CAUTION: KEEP OUT OF REACH OF CHILDREN

HARMFUL IF SWALLOWED. WASH THOROUGHLY AFTER USE. AVOID CONTAMINATION OF FOOD, FEEDSTUFFS, DRINKING WATER, FISH PONDS, ETC. DO NOT REUSE CONTAINER, DESTROY WHEN EMPTY.
