# DANGER!

**IMPORTANT:** Read these entire Directions and Conditions of Sale, including the Warranty and Limitation of Damages provision, before using DNBP-35.

**CONDITION OF SALE:** These Directions for Use reflect the opinion of experts based on tests of effectiveness, of toxicity to plants and laboratory animals and of residues on or in food and feed under normal conditions of use. However, because of the wide range of conditions under which this product may be used, even though label directions are followed, it is impossible to eliminate all risks associated with its use because of abnormal conditions beyond the control of the seller. Retzloff Chemical Company and the Seller offer, and the Buyer uses, this product subject to the understanding that the Buyer assumes all such risks.

#### WARNING

MAY BE FATAL IF SWALLOWED OR VAPOR ABSORBED THROUGH THE SKIN.

AVOID BREATHING SPRAY DRIFT, OR VAPOR.

DO NO'I TAKE INTERNALLY.

DO NOT GET IN EYES, ON SKIN, ON CLOTHING.

DO NOT WEAR CONTAMINATED CLOTHING OR SHOES.

KEEP AWAY FROM CHILDREN, DOMESTIC ANIMALS AND FOODSTUFFS. This product is toxic to fish and wildlife. keep out of any body of water. Birds feeding on treated areas may be killed. Do not contaminate water by cleaning of equipment, or disposal of wastes.

### DIRECTIONS:

DO NOT APPLY WHEN AIR TEMPERATURES EXCEED 70 DEGREES F.

DNBP-3S mixes readily in most waters with moderate agitation. In unusually hard water a tarry sludge may form in the sprayer and clog the screens. To avoid this add 1 lb. Calgon type water softener per 100 gal. water before the herbicide is added.

Beans: Snap, Field, Lima, Soy, Pre-emergence use 1.5-2 gallons of DNBP-3S per acre in about 30 gallons of water as an overall spray shortly after planting. Do not apply to light sandy soils.

Soybeans: Post-emergence use 3 or 4 quarts of DNBP-3S in about 30 gallons of water as an over-all spray when the beans are in the cotyledon to first true leaf stage and the weeds are up. Do not apply if temperatures above 70°F are anticipated. Do not apply to light sandy soils.

Potatoes: Pre-emergence use 1 to 2 gallons of DNBP-3S in 30 to 40 gallons of water just before emergence. Use the higher rate if grasses are a serious problem.

NOTE — Recommended dosages are for overall application. If band spraying is used dosage should be decreased proportionately. Apply with low pressure (25-50 lb.) low volume spray equipment. Do not use machinery containing a residue of copper. If rinsing does not remove copper wash sprayer with a 1% acetic acid solution for 2 hours (but not more than 3 hours) and rinse with clean water.
