At the recommended rates, apply Gustafson RTU-PCNB undiluted directly from the drum to the seed. If desired, add one part water to five parts Gustafson RTU-PCNB and recalibrate equipment so that recommended rates will still be applied. Slight agitation may be required to mix the material.

USE ON WHEAT FOR KARNAL BUNT

To aid in the control of wheat seed-borne Karnal bunt, use 3 fl. oz. per 100 lbs. of seed. Application should be made with RTU-Vitavax-Thiram, using standard mechanical, slurry or mist-type commercial seed treatment equipment. Seed treatment has no effect on the soil-borne inoculum.

Keep container tightly closed when not in use. Do not feed treated seed to animals.

IMPORTANT:

The Federal Government and most states have seed laws or regulations requiring an appropriate caution statement be affixed to bags containing treated seeds, such as:

This seed treated with Pentachloronitrobenzene (PCNB).
