DIRECTIONS FOR USE

Gustafson Vitavax-PCNB Flowable Fungicide is a ready-to-use seed treatment.
BARLEY, WHEAT AND OATS

Gustafson Vitavax-PCNB Flowable Fungicide combines the systemic action of carboxin with the surface action of PCNB to control various seed and seedling diseases. It is particularly effective against *Rhizoctonia solani*.

Use 3-4 fluid ounces of Gustafson Vitavax-PCNB Flowable Fungicide per 100 pounds of seed. Gustafson Vitavax-PCNB Flowable Fungicide should be applied as a slurry treatment by machine. Use the higher rate under conditions of expected heavy disease pressure.

In addition, loose smut (*Ustilago nuda*) and covered smut (*Ustilago hordei*) are controlled on barley, and loose smut (*Ustilago tritici*) and common bunt (*Tilletia caries*) are controlled on wheat by Gustafson Vitavax-PCNB Flowable Fungicide.

USE RESTRICTIONS

Do not use treated seed for food or feed purposes. Do not graze or feed livestock on treated areas for six weeks after planting. Care must be exercised in the handling of treated seed.

COMPATIBILITY

Gustafson Vitavax-PCNB Flowable Fungicide should not be tank mixed with any pesticide unless adequate physical and compatibility and phytotoxicity tests have been completed and proved to be satisfactory.
