DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**STORED GRAIN:** For protection of barley, oats, rice, sorghum and wheat against injury from stored grain weevils, moths, borers, beetles and mealworms including granary weevil, rice weevil, red flour beetle, confused flour beetle, saw-toothed grain beetle, Indian meal moth, Angoumois grain moth and lesser grain borer. Apply to the grain at the rate of 10 lbs. of product per 1000 bu. as the grain is being loaded or turned into final storage. To protect stored grains from attack by Indian meal moth, apply to the surface of clean or infested grain at the rate of 7 lbs. per 1000 sq. ft. of grain surface area. Apply evenly. Repeat if necessary.

HOW TO APPLY TO ~~SHELLED CORN AND~~ SMALL GRAINS

Apply Gustafson 3% RELDAN Powder Insecticide when grain is in the truck or wagon prior to binning. To determine the amount in the truck or wagon, multiply the length by width by depth (all in feet) and multiply this total by 0.8 to get the number of bushels. Measure out the correct amount of Gustafson 3% RELDAN Powder Insecticide (10 lbs. per 1000 bu.) and spread evenly over the surface of the grain in the truck or wagon. Cut into the grain with a shovel. Coating will become mixed with grain as it is dumped from the truck or wagon into the hopper. Further mixing will occur when the grain is augered or blown into the bin. Mixing is completed as the coating and grain roll down the cone shaped pile in the bin.
