Use only recommended rates. Lower amounts may not give the desired control. Excessive amounts may cause seed injury. This material is a special formulation of 4-Way which, when used at the correct application rates, protects peanut seed against seed or soilborne diseases such as damping-off, root rot, seed decay and seedling blight.

RECOMMENDATIONS

Apply at the rate of 4 to 6 ounces of product per 100 lbs. of peanut seed by mixing 4-Way with the seed in the planter box, drill box or the hopper of the dust applicator. DO NOT MIX WITH HANDS.

Use the higher dose rate when disease pressure is severe.

IMPORTANT! Bags containing treated seed should be labeled as follows: TREATED SEED -DO NOT USE FOR FEED, FOOD OR OIL PURPOSES.

USE RESTRICTION

If this product is used on a crop, no other product containing a different EBDC active ingredient may be used on the same crop during the same growing season.

STATEMENT**

Treatment of highly mechanically damaged seed, or seed of known low vigor and poor quality, except for the purposes of curative control of existing disease or insect pests, may result in reduced germination and/or reduction of seed and seedling vigor. Treat and conduct germination tests on a small portion of seed before committing the total seed lot to a selected chemical treatment. Due to seed quality conditions beyond the control of Gustafson, Inc., no claims are made to guarantee germination of carry-over seed.
