**For On-Farm Planter Box Application Or For Use On Seed Prior To Placement In Planter Box.**

SHAKE WELL BEFORE USING. TRIPLE-NOCTIN L is formulated as an oil-based suspension. Such suspensions tend to separate slightly prior to use. The heavier components settle, leaving a thinner layer on the surface. To maintain the designed fluidity of this product, DO NOT POUR THIS THINNER LAYER FROM THE BOTTLE UNTIL IT IS PROPERLY MIXED BY THOROUGHLY SHAKING THE BOTTLE.

Apply at the rate of 4 fl. oz. per bushel of soybean seed, or the contents of this container to 12 bushels of soybean seed. Mix or stir until a uniform color is imparted to all seed.

Partially fill planter box or mixing container with seed. Apply the proper portion of recommended rate of TRIPLE-NOCTIN L evenly over the surface of the seed and stir with a stick or paddle. Repeat partial filling with seed and TRIPLE-NOCTIN L until planter box or mixing container is filled. Use as soon as possible.

Frequently inspect planting mechanisms, seed drum and hopper box to ensure these areas are clear. Clean any accumulation.

See bottom of bottle for expiration date of this product.
