RECOMMENDED APPLICATIONS

APRON-TERRACLOR will control damping-off, seed and seedling rot diseases caused by *Pythium spp.* and *Rhizoctonia solani*. APRON-TERRACLOR will also provide early season control of *Phytophthora* in soybeans.

PLANTER BOX TREATMENT

Apply at the specified rate and premix with the seed directly in the planter box at planting. A non-oil lubricant has also been added to help seeds flow more easily and evenly from the planter box. Use the higher rate of application in fields with a history of severe disease pressure.

SEED TREATER APPLICATION

APRON-TERRACLOR may be applied at planting time, utilizing the Gustafson CF-80* treater to maximize seed coverage. (*Calibrate the Gustafson CF-80 as per the manufacturer's instructions.) Do not use the CF-80 for applications to peanuts.

CROPS	RATE	DISEASE
Cotton	8 oz./cwt.	<i>Pythium</i> and <i>Rhizoctonia</i> Seedling Disease Complex, Common Smut or Bunt (Wheat), Covered Smut (Barley)
Peanuts	4 to 8 oz./cwt.	
Barley, Rice	2 to 4 oz./bu.	
Beans, Corn, Wheat	2 oz./bu.	
Soybeans, Peas	4 oz./bu.	<i>Pythium</i> and <i>Rhizoctonia</i> Seedling disease Complex, Early Season <i>Phytophthora</i> .

USE RESTRICTIONS

Do not use treated seed for food, feed or oil purposes. All seed treated with this product (except by the planter box method) must be colored with an EPA-approved dye (e.g., those listed in 40 CFR 180.1001) which imparts an unnatural color to the seed.
