RECOMMENDED APPLICATIONS

WHEAT AND BARLEY: For control of common root rot (*Helminthosporium sativum*) and barley leaf stripe, use 0.25 to 0.5 fl. oz. of Gustafson FLO-PRO IMZ Flowable per 100 pounds of seed.

This product is to be applied using commercial slurry or on-farm seed treating equipment. It is recommended Gustafson FLO-PRO IMZ Flowable be applied in combination with VITAVAX®-200 or other flowable suspension seed treatments to provide additional disease control at the respective labeled rates. Pre-test for compatibility with other flowable suspension seed treatments. Do not tank mix Gustafson FLO-PRO IMZ Flowable with E. C. products which contain solvents.

FLO-PRO IMZ Flowable with products containing lindane may result in delayed emergence and stunting of wheat and barley; however plants will usually outgrow this effect. Do not carry over seed treated with lindane to the next crop season. Minimize time between treating and planting for such treatments.

USE PRECAUTION: All seed treated with this product must be adequately dyed. Any dye added to treated seed must be cleared for use under 40 CFR 180.1001.

SEED LABELING: Seeds treated with imazalil. Do not use for food, feed or oil purposes. Do not graze or feed foliage from treated area to livestock. Add appropriate language for any additional treatments applied to seed.
